Beware of the Other Side(s) Heike Schwarz, 2014-03-15 This interdisciplinary study examines the still vivid phenomenon of the most controversial psychiatric diagnosis in the United States multiple personality disorder now called dissociative identity disorder This syndrome comprehends the occurrence of two or more distinct identities that take control of a person's behavior paired with an inexplicable memory loss Synthesizing the fields of psychiatry and the dynamics of the disorder with its influential representation in American fiction the study researches how psychiatry and fiction mutually shaped a mysterious syndrome and how this reciprocal process created a genre fiction of its own that persists until today in a very distinct self-referential mode

Narrative Framing in Contemporary American Novels

Sławomir Studniarz, 2017-05-11 This volume examines a range of novels and novellas published over the course of nearly forty years from 1968 to 2014 including E. L. Doctorow's *Andrew's Brain* John Gardner's *The King's Indian* Paul Auster's *Travels in the Scriptorium* Peter Straub's *Mr X* and Joyce Carol Oates' *Expensive People* These texts display one crucial unifying thread they are doubly mediated fictions fictions in parentheses so to speak The application of narrative framing and embedding has been commonly acknowledged and abundantly researched in various works belonging to the Western literary heritage However its use in the twentieth and twenty-first century fiction has not been adequately explored perhaps with the exception of the literary creations of such giants as Vladimir Nabokov and John Barth Despite this critical oversight narrative frames prove to be a major resource for modern-day novelists who adapt this literary device and very effectively put it to their own uses The essays collected in this volume will serve to spark the revival of interest in this time-honored narrative tool demonstrating its validity for research into more recently created novels

Popular Fiction and Brain Science in the Late Nineteenth Century Anne Stiles,2011-12-22 In the 1860s and 1870s leading neurologists used animal experimentation to establish that discrete sections of the brain regulate specific mental and physical functions These discoveries had immediate medical benefits David Ferrier s detailed cortical maps for example saved lives by helping surgeons locate brain tumors and haemorrhages without first opening up the skull These experiments both incited controversy and stimulated creative thought because they challenged the possibility of an extra corporeal soul This book examines the cultural impact of neurological experiments on late Victorian Gothic romances by Robert Louis Stevenson Bram Stoker H G Wells and others Novels like Dracula and Dr Jekyll and Mr Hyde expressed the deep seated fears and visionary possibilities suggested by cerebral localization research and offered a corrective to the linearity and objectivity of late Victorian neurology Towards an Ecology of Brain R. Walsh,2012-12-06 Let us then consider for a moment the

world as described by the physicist It consists of a number of fundamental particles which appear bound by certain natural laws which indicate the form of their relationship_ Now the physicist himself who describes all this is in his own account himself constructed of it He is in short made of a conglomeration of the very particulars he describes no more no less bound together by and obeying such general laws as he himself has managed to find and to record Thus we cannot escape the fact that the world we know is constructed in order and thus in such a way as to be able to see itself This is indeed amazing Not

so much in view of what it sees although this may appear fantastic enough but in respect of the fact that it can see at all But in order to do so evidently it must first cut itself up into at least one state which sees and at least one other state which is seen In this severed and mutilated condition what ever sees is only partially itself We may take it that the world undoubtedly is itself i e is indistinct from itself but in any attempt to see itself as an object it must equally undoubtedly act so as to make itself distinct from and therefore false to itself In this condition it will always partially elude itself *Intractable Seizures* W. McIntyre Burnham, Peter L. Carlen, Paul A. Hwang, 2012-12-06 About 20% of people with epilepsy have seizures which are resistant to anticonvulsant medications These drug resistant seizures are called intractable and the patients who have them about 1 in 500 of the general population present a major challenge to neurologists and epilepsy associations The present volume describes the symptomatology of the major intractable syndromes the most appropriate drugs for each and the possibilities for surgical control Research related to the causes and effects of unchecked seizures is presented and new directions in prevention and therapy are discussed **Charles Johnson's Novels** Rudolph P. Byrd, 2005-06-13 This is truly a major contribution to African American literary criticism and it promises to elevate Johnson to the place in the literary firmament he so richly deserves Henry Louis Gates Jr Harvard University Charles Johnson came of age during the Black Arts Movement of the 1960s and 1970s His fiction bears the imprint of his formal training as a philosopher and his work as a journalist and cartoonist with a well honed interest in political satire Mentored by the American writer John Gardner Johnson is preoccupied with questions of morality which are informed by his knowledge of Continental and Asian philosophical traditions In this book Rudolph Byrd examines Johnson's four novels Faith and the Good Thing Oxherding Tale Middle Passage National Book Award Winner and Dreamer under the rubric of philosophical black fiction as art that interrogates experience Byrd contends that Johnson suspends shelves and brackets all presuppositions regarding African American life This bracketing accomplished the African American experience becomes a pure field of appearances within two poles consciousness and the people or phenomena to which it is related Johnson's principal themes are identity and liberation Intent upon the liberation of perception for the reader and the writer Johnson's fiction aims at whole sight encompassing a plurality of meanings across a symbolic geography of forms texts and traditions from within the matrix of African American life and culture And like a palimpsest Johnson's texts contain multiple layers of meaning of disparate origins imprinted over time with varying degrees of visibility and significance Charles Johnson's Novels will appeal to fans of the writer's work but it also will serve as a helpful guide for readers newly introduced to this brilliant contemporary American writer *Marsden's Book of Movement Disorders* Ivan Donaldson, C.
