

ANIMAL RIGHTS

Some people believe that animals should be treated in the same way humans are and have similar rights, whereas others think that it is more important to use them as we desire for food and medical research. This essay will discuss both points of view.

With regard to the exploitation of animals, people believe it is acceptable for several reasons. Firstly, they think that humans are the most important beings on the planet, and everything must be done to ensure human survival. If this means experimenting on animals so that we can fight and find cures for diseases, then this takes priority over animal suffering. Furthermore, it is believed by some that animals do not feel pain or loss as humans do, so if we have to kill animals for food or other uses, then this is morally acceptable.

However, I do not believe these arguments stand up to scrutiny. To begin, it has been shown on numerous occasions by secret filming in laboratories via animal rights groups that animals feel as much pain as humans do, and they suffer when they are kept in cages for long periods. Well you curious about how they feel? Lock yourselves in cages! In addition, a substantial amount of animal research is done for cosmetics, not to find cures for diseases, so this is unnecessary. Finally, it has also been proven that humans can get all the nutrients and vitamins that they need from green vegetables and fruit. Therefore, again, having to kill animals for food is not an adequate argument.

Then again, you still see videos and pictures which are torturing to the bare eyes. Videos and pictures of animal cruelty. Its great that there are people out there trying to convert us omnivores to be pescatarians. What is pescatarian you may ask? Pescatarians are are similar to vegetarians just that they eat fishes. There! My point is made. People neglect the fishes. ' Oh theyre just fishes' '
