Animals In Greek And Roman Thought Stephen Newmyer:

Animals in Greek and Roman Thought Stephen T. Newmyer, 2010-11-09 Although reasoned discourse on human animal relations is often considered a late twentieth century phenomenon ethical debate over animals and how humans should treat them can be traced back to the philosophers and literati of the classical world From Stoic assertions that humans owe nothing to animals that are intellectually foreign to them to Plutarch's impassioned arguments for animals as sentient and rational beings it is clear that modern debate owes much to Greco Roman thought **Animals in Greek and Roman Thought** brings together new translations of classical passages which contributed to ancient debate on the nature of animals and their relationship to human beings The selections chosen come primarily from philosophical and natural historical works as well as religious poetic and biographical works The questions discussed include Do animals differ from humans intellectually Were animals created for the use of humankind Should animals be used for food sport or sacrifice Can animals be our friends The selections are arranged thematically and within themes chronologically A commentary precedes each excerpt transliterations of Greek and Latin technical terms are provided and each entry includes bibliographic suggestions for further reading [Animals in Greek, Arabic, and Latin Philosophy](#), 2025-10-08 Non human animals are a topic of intense philosophical interest in the modern day It is often supposed that this is a recent development but in fact pre modern philosophers were intensely interested in animals Aristotle initiated a long standing zoological tradition but it was only part of the vast literature on animals in antiquity and the middle ages To do it justice this book gathers twenty five studies of animals in Greek Arabic and Latin philosophy Major themes include the cognitive capacities of animals the difference between humans and animals and the question of how humans should treat animals as well as God's relationship towards animals animal diet and mating language among animals animal suffering animals as ethical exemplars and reincarnation Contributors Peter Adamson Tommaso Alpina Hanif Amin Beidokhti Zack Candy Sophia M Connell Rachael Omari Kosta Gligorijevic Guy Guldentops Rotraud Hansberger Paloma Hernandez Rubio Tua Korhonen Behnam Khodapanah Philip Line Thornton Lockwood Ruizhi Ma Janne Mattila Robert Mayhew Michele Meroni Bahodir Musametov Giulio Navarra Maril Papandreou Nicolas Payen Michael Payne Jens Ole Schmitt John Skalko and Miira Tuominen **Animals and Animality in the Babylonian Talmud** Beth A. Thomas, 2017-08-21 The seventeen contributions to this volume written by leading experts show that animals and humans in Graeco Roman antiquity are interconnected on a variety of different levels and that their encounters and interactions often result from their belonging to the same structures networks and communities or at least from finding themselves together in a certain setting context or environment wittingly or unwittingly Papers explore the concrete categories of interaction between animals and humans that can be identified in what contexts they occur and what

types of evidence can be productively used to examine the concept of interactions Articles in this volume take into account literary visual and other types of evidence A comprehensive research bibliography is also provided **Animals in Greek and Roman Thought** Stephen Thomas Newmyer,2008 *The Studia Philonica Annual XXXVII, 2025* David T. Runia, Gregory E. Sterling,2025-11-21 The Studia Philonica Annual is a scholarly journal devoted to the study of Hellenistic Judaism particularly the writings and thought of the Hellenistic Jewish writer Philo of Alexandria circa 15 BCE to circa 50 CE This volume includes a special section on Philo's De providentia six additional articles annotated bibliographies and a book review section **The Animal and the Human in Ancient and Modern Thought** Stephen Newmyer,2016-12-01 Ancient Greeks endeavored to define the human being vis vis other animal species by isolating capacities and endowments which they considered to be unique to humans This approach toward defining the human being still appears with surprising frequency in modern philosophical treatises in modern animal behavioral studies and in animal rights literature to argue both for and against the position that human beings are special and unique because of one or another attribute or skill that they are believed to possess Some of the claims of man's unique endowments have in recent years become the subject of intensive investigation by cognitive ethologists carried out in non laboratory contexts The debate is as lively now as in classical times and what is of particular note the examples and methods of argumentation used to prove one or another position on any issue relating to the unique status of human beings that one encounters in contemporary philosophical or ethological literature frequently recall ancient precedents This is the first book length study of the man alone of animals topos in classical literature not restricting its analysis to Greco Roman claims of man's intellectual uniqueness but including classical assertions of man's physiological and emotional uniqueness It supplements this analysis of ancient manifestations with an examination of how the commonplace survives and has been restated transformed and extended in contemporary ethological literature and in the literature of the animal rights and animal welfare movements Author Stephen T Newmyer demonstrates that the anthropocentrism detected in Greek applications of the man alone of animals topos is not only alive and well in many facets of the current debate on human animal relations but that combating its negative effects is a stated aim of some modern philosophers and activists **Medieval Jewish Philosophy and Its Literary Forms** Aaron W. Hughes, James T. Robinson,2019-07-11 This well written accessible essay collection demonstrates a maturation in Jewish studies and medieval philosophy Choice Too often the study of philosophical texts is carried out in ways that do not pay significant attention to how the ideas contained within them are presented articulated and developed This was not always the case The contributors to this collected work consider Jewish philosophy in the medieval period when new genres and forms of written expression were flourishing in the wake of renewed interest in ancient philosophy Many medieval Jewish philosophers were highly accomplished poets for example and made conscious efforts to write in a poetic style This volume turns attention to the connections that medieval Jewish thinkers made between the literary the exegetical the philosophical and the mystical to

shed light on the creativity and diversity of medieval thought As they broaden the scope of what counts as medieval Jewish philosophy the essays collected here consider questions about how an argument is formed how text is put into the service of philosophy and the social and intellectual environment in which philosophical texts were produced

Animal Rhetoric and Natural Science in Eighteenth-Century Liberal Political Writing Andrew Billing,2023-12-07 Our tendency to read French Enlightenment political writing from a narrow disciplinary perspective has obscured the hybrid character of political philosophy rhetoric and natural science in the period As Mich le Duchet and others have shown French Enlightenment thinkers developed a philosophical anthropology to support new political norms and models This book explores how five important eighteenth century French political authors Rousseau Diderot La Mettrie Quesnay and R tif de La Bretonne also constructed a political zoology in their philosophical and literary writings informed by animal references drawn from Enlightenment natural history science and physiology Drawing on theoretical work by Derrida Latour de Fontenay and others it shows how these five authors signed on to the old rhetorical tradition of animal comparisons in political philosophy which they renewed via the findings and speculations of contemporary science Engaging with recent scholarship on Enlightenment political thought it also explores the links between their political zoologies and their family resemblance as liberal political thinkers

Animals, Rights and Reason in Plutarch and Modern Ethics Stephen T. Newmyer, 2013-04-15 This groundbreaking volume explores Plutarch s unique survival in the argument that animals are rational and sentient and that we as humans must take notice of their interests Exploring Plutarch s three animal related treatises as well as passages from his ethical treatises Stephen Newmyer examines arguments that strikingly foreshadow those found in the works of such prominent animal rights philosophers as Peter Singer and Tom Regan Unique in viewing Plutarch s opinions not only in the context of ancient philosophical and ethical thought but also in its place in the history of animal rights speculation *Animals Rights and Reasons* points out how remarkably Plutarch differs from such anti animal thinkers as the Stoics Classicists philosophers animal welfare students and interested readers will all find this book an invaluable and informative addition to their reading
