Making Compost Making a Worm Farm Herbal Plants in Your Raised Garden Staggered Harvests Lasagna Gardening Conclusion Author Bio Introduction The first time I came across an example of raised bed gardening my reaction was that is an extremely sensible way of gardening you do not have to stoop down to ground level I was seeing these raised garden beds in a friend's home She loved gardening She also had back trouble So crouching down in front of her beloved flower and vegetable as well as herbal garden in order to de-weed them was purgatory to her And then her handy do-it-yourself practical husband said Why don't we raise the crops and plants in beds which are waist high And he immediately set about building 4 feet wide beds in square shaped blocks with wood The soil was raised above ground level and placed in that wooden frame The results were amazing It was only 10 years later that I found out that raised bed gardening was being practiced extensively all over the world Avid gardeners were making bed frames out of concrete rock and even wood They made the containers to their own particular requirements with dimensions ranging from 1.0 m to 2 m depending on the space they had Gardening in containers is all very well but raised gardening eliminates the use of pots And best of all as my friend told me I do the gardening on my raised bed Himself her enthusiastic DIY gardener husband plans to plant plants which love the shade under the raised beds In that way we are utilizing every inch of the soil as well as lots of space above ground level What a sensible way to make gardens in limited spaces She has the right of it And this is possibly the reason why so many people want to know all about raised bed gardening in rich organic compost laden soil So as you are one of them let us start with how we can utilize every square inch of our land economically and beneficially by making raised beds how to make them how to take care of them and how to enjoy their harvest I definitely advocate natural methods for gardening so I am going to tell you about the best organic and natural gardening practices which people all over the world have been using for centuries Take advantage of our technology in other aspects of gardening like watering etc but still use the old natural methods for fertilizing the soil

prayed to the rain God If he did not come on time we would be sunk The bank and the money lender would take our land and then there would be no resort but to starve or go to the city to survive or lend ourselves out in bonded labor to a more prosperous farmer This may sound shocking to people in well developed countries but this is still the sort of existence which is being led by people in many parts of the world Even today in this day of state of the art technology and technological development underdeveloped countries still follow obsolete agricultural practices which do not take into account the natural resources already around them And so famine has been a part of their lives for centuries So here are some rules which you are going to implement right now to make sustainable gardening possible
