Cottage Gardens and Gardeners in the East of Scotland, 1750-1914 Catherine Rice, 2021 This pioneering study tells the story of the emergence of rural workers gardens during a period of unprecedented economic and social change in the most dynamic and prosperous region of Scotland Much criticised as weed infested badly cultivated and disfigured by the dung heap before the cottage door eighteenth century cottage gardens produced only the most basic food crops But the paradox is that Scottish professional gardeners at this time were highly prized and sought after all over the world And by the eve of the First World War Scottish cottage gardeners were raising flowers fruit and a wide range of vegetables and celebrating their successes at innumerable flower shows This book delves into the lives of farm servants labourers weavers miners and other workers living in the countryside to discover not only what vegetables fruit and flowers they grew and how they did it but also how poverty insecurity and long and arduous working days shaped their gardens Workers cottage gardens were also expected to comply with the needs of landowners farmers and employers and with their expectations of the industrious cottager But not all the gardens were muddy cabbage and potato patches and not all the gardeners were ignorant or unenthusiastic The book also tells the stories of the keen gardeners who revelled in their pretty plots raised prize exhibits for village shows and in a few cases found gardening to be a stepping stone to scientific exploration **LIFE** ,1972-05-05 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century It now lives on at LIFE com the largest most amazing collection of professional photography on the internet Users can browse
