Digital Pricing Strategy Stephan M. Liozu, Andreas Hinterhuber, 2023-06-27. Digital Pricing Strategy provides a best practice overview of how companies design, analyze, and execute digital pricing strategies. Bringing together insights from academic and professional experts globally, the text covers essential areas of the value and pricing of data platform pricing, pricing of subscriptions, and monetization of the global environment. Case studies, examples, and interviews from leading organizations including Zuora, Honeywell, Relayr, Alcatel Lucent, ABB, Thales, and General Electric illustrate key concepts in practice. To aid student learning, chapter objectives, summaries, and key questions feature in every chapter alongside PowerPoint slides and a test bank available online for lecturers. Comprehensive and applied in its approach, this text provides postgraduate MBA and Executive Education students with an understanding of the capabilities, processes, and tools that enable executives to effectively implement digital transformations and capture value from digital innovations.

Professional Web APIs with PHP Paul Reinheimer, 2006-07-31. Offers hands-on tips and numerous code examples that show Web developers how to leverage content and feeds from today's top Web sites including Google, eBay, PayPal, Amazon, Yahoo, and FedEx. Introduces APIs, Application Program Interfaces in general, and uses real-world examples that show how to produce and document them. Explains how to use the popular scripting language PHP to create APIs that interact with unrelated applications over the Web. Examples take readers through each stage of the API process from basic test implementations to integration with existing sites.

Intelligent Systems and Applications Kohei Arai, 2021-08-03. This book presents Proceedings of the 2021 Intelligent Systems Conference, which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic, pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

Enshittification Cory Doctorow, 2025-10-14. Longlisted for the Financial Times and Schroders Business Book of the Year 2025. Misogyny, conspiratorialism, surveillance, manipulation, fraud, and AI slop are drowning the internet. For the monopolists who dominate online: X, TikTok, Amazon, Meta, Apple, this is all part of the playbook. The process is what leading tech critic Cory Doctorow has dubbed enshittification. First, the platform attracts users with some bait such as free

access then the activity is monetized bringing in the business customers and degrading the user experience then once everyone is trapped and competitors eradicated the platform wrings out all the value and transfers it to their executives and shareholders As a result online public squares have become places of torment and online retailers are hellish dumpster fires The virtual gathering places where we once imagined the world's problems might be resolved are now a sewer of hatred and abuse thoroughly enshittified Doctorow enumerates the symptoms lays out the diagnosis and identifies the best responses to these diseased platforms the monopolies online must be shattered Companies too big to fail or to jail and much too big to care must be cut down to size Only an attack on corporate power will permit effective regulation and real privacy Tech unions must protect the workers who should in turn defend us against their bosses sadism and greed Praise for The Internet Con One of the Internet's most interesting writers Edward Snowden This book fills me with hope that a radical yet plausible alternative to computational tyranny can be developed and deployed Douglas Rushkoff author of Survival of the Fittest This book is the instruction manual Big Tech doesn't want you to read It deconstructs their crummy products undemocratic business models rigged legal regimes and lies Crack this book and help build something better Astra Taylor A brilliant barn burner of a book Cory is one of the sharpest tech critics and he shows with fierce clarity how our computational future could be otherwise Kate Crawford author of The Atlas of AI
