Manual of Clinical Paramedic Procedures Pete Gregory, Ian Mursell, 2015-06-01 I can enthusiastically recommend the Manual of Clinical Paramedic Procedures as the book that I wish had been available to me when I was studying to become a paramedic From the foreword by Professor Malcolm Woollard Chair College of Paramedics Professor in Pre hospital and Emergency Care Director Pre hospital Emergency Cardiovascular Care Applied Research Group Coventry University Clinical procedures are a fundamental aspect of care for practitioners working in pre hospital settings The Manual of Clinical Paramedic Procedures is written specifically to support the practice of paramedics ambulance technicians first responders and volunteer ambulance personnel It presents up to date evidence based expert knowledge enabling paramedics to deliver effective patient focused care This accessible handbook provides a comprehensive exploration of core competencies and skills looking at topics including Aseptic Technique Airway Management Assisted Ventilation Cardiopulmonary Resuscitation Defibrillation and External Cardiac Pacing Observations Pain Assessment Management Respiratory Therapy Spinal Management and Venepuncture Each chapter provides the relevant anatomy physiology evidence based rationales for each procedure and contraindications of use Key features The first UK text to explore clinical procedures for paramedics With further reading and illustrations throughout All procedures include the rationale for the action recommended Guides paramedics in the clinical application of evidence based procedures *Fire and Rescue Service manual* Great Britain. Fire Service Inspectorate, 2007-03-07 Incidents involving rescue from road vehicles are dramatically increasing in frequency There are some 3500 deaths on the road each year with 35 000 serious injuries Modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped The Fire and Rescue Service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the UK This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care Each chapter forms an independent reference source but the publication as a whole forms a complete guide Chapters cover vehicle design and construction dealing with incidents safety procedures operational procedures extrication equipment medical considerations and trauma care Integrated Personal Development System I P D S Appendices cover Highways Agency Fire and Rescue Service memorandum of understanding training and general information and emergency services personnel ESP aide m moire The CD ROM Vehicle extrication techniques is a multi media guide to rescue tool handling and extrication techniques *Pre-hospital Obstetric Emergency Training* Advanced Life Support Group (ALSG), 2009-10-30 The Pre hospital Obstetric Emergency Training POET programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy including interpretation of patient held records and rapid assessment of the obstetric patient It includes clear definitions and describes risk factors diagnosis and pre hospital management of significant problems that occur in both early and late

pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and hands-on course will help practitioners identify and manage a range of time-critical obstetric emergencies specifically in the pre-hospital setting and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before transport as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors and nurses working in the emergency pre-hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.
