America S Lost Identity:

Immigration and National Identities in Latin America Nicola Foote, Michael Goebel, 2016-12-10 This groundbreaking study examines the connection between what are arguably the two most distinguishing phenomena of the modern world the unprecedented surges in global mobility and in the creation of politically bounded spaces and identities Jose C Moya author of *Cousins and Strangers* An excellent collection of studies connecting transnational migration to the construction of national identities Highly recommended Luis Roniger author of *Transnational Politics in Central America* The importance of this collection goes beyond the confines of one geographic region as it offers new insight into the role of migration in the definition and redefinition of nation states everywhere Fraser Ottanelli coeditor of *Letters from the Spanish Civil War* This volume has set the standard for future work to follow Daniel Masterson author of *The History of Peru* Between the mid nineteenth and mid twentieth centuries an influx of Europeans Asians and Arabic speakers indelibly changed the face of Latin America While many studies of this period focus on why the immigrants came to the region this volume addresses how the newcomers helped construct national identities in the Caribbean Mexico Argentina and Brazil In these essays some of the most respected scholars of migration history examine the range of responses some welcoming some xenophobic to the newcomers They also look at the lasting effects that Jewish German Chinese Italian and Syrian immigrants had on the economic sociocultural and political institutions These explorations of assimilation race formation and transnationalism enrich our understanding not only of migration to Latin America but also of the impact of immigration on the construction of national identity throughout the world Contributors J rgen Buchenau Jeane DeLaney Nicola Foote Michael Goebel Steven Hyland Jr Jeffrey Lesser Kathleen L pez Lara Putnam Raanan Rein Stefan Rinke Frederik Schulze **The American**

Decisions ,1884 **America's Lost Identity** Charles T. Wilcox, 2014-12-05 This book is the result of many hours of discussions on various film sets and fact finding about the real motivating factors of the US Civil War and the turmoil of the Lincoln years The Constitution was in fact a declaration of war against the feudal principles of the Vatican and European Monarchies just as the creation of the government of Ancient Israel a government under God was a declaration of war against guiding principles of the surrounding nations of its day What truly defines American exceptionalism What happens when their global influence wanes And why should we be deeply concerned [The American State Reports](#) Abraham Clark Freeman, 1889 *A Critical Introduction to Religion in the Americas* Michelle A. Gonzalez, 2014 A Critical Introduction to Religion in the Americas argues that we cannot understand religion in the Americas without understanding its marginalized communities Despite frequently voiced doubts among religious studies scholars it makes the case that theology and particularly liberation theology is still useful but it must be reframed to attend to the ways in which religion is actually experienced on the ground That is a liberation theology that assumes a need to work on behalf of the poor can seem out of touch with a population experiencing huge Pentecostal and Charismatic growth where the focus is not on inequality or social

action but on individual relationships with the divine By drawing on a combination of historical and ethnographic sources this volume provides a basic introduction to the study of religion and theology in the Latino a Black and Latin American contexts and then shows how theology can be reframed to better speak to the concerns of both religious studies and the real people the theologians work is meant to represent Informed by the dialogue partners explored throughout the text this volume presents a hemispheric approach to discussing lived religious movements While not dismissive of liberation theologies this approach is critical of their past and offers challenges to their future as well as suggestions for preventing their untimely demise It is clear that the liberation theologies of tomorrow cannot look like the liberation theologies of today

Alcoff, 2005-12-22 In the heated debates over identity politics few theorists have looked carefully at the conceptualizations of identity assumed by all sides *Visible Identities* fills this gap Drawing on both philosophical sources as well as theories and empirical studies in the social sciences Mart n Alcoff makes a strong case that identities are not like special interests nor are they doomed to oppositional politics nor do they inevitably lead to conformism essentialism or reductive approaches to judging others Identities are historical formations and their political implications are open to interpretation But identities such as race and gender also have a powerful visual and material aspect that eliminativists and social constructionists often underestimate *Visible Identities* offers a careful analysis of the political and philosophical worries about identity and argues that these worries are neither supported by the empirical data nor grounded in realistic understandings of what identities are Mart n Alcoff develops a more realistic characterization of identity in general through combining phenomenological approaches to embodiment with hermeneutic concepts of the interpretive horizon Besides addressing the general contours of social identity Mart n Alcoff develops an account of the material infrastructure of gendered identity compares and contrasts gender identities with racialized ones and explores the experiential aspects of racial subjectivity for both whites and non whites In several chapters she looks specifically at Latino identity as well including its relationship to concepts of race the specific forms of anti Latino racism and the politics of mestizo or hybrid identity *Digest of the American Decisions*

American Covenant Philip Gorski,2017-02-21 An authoritative account of the long battle between exclusionary and inclusive versions of the American story Was the United States founded as a Christian nation or a secular democracy Neither argues Philip Gorski in American Covenant What the founders actually envisioned was a prophetic republic that would weave together the ethical vision of the Hebrew prophets and the Western political heritage of civic republicanism In this ambitious book Gorski shows why this civil religious tradition is now in peril and with it the

American experiment Gorski traces the historical development of prophetic republicanism from the Puritan era to the present day He provides close readings of thinkers such as John Winthrop Thomas Jefferson Frederick Douglass W E B Du Bois and Hannah Arendt along with insightful portraits of recent and contemporary religious and political leaders such as Jerry Falwell Pat Robertson Ronald Reagan George W Bush and Barack Obama Gorski shows how the founders original vision for America is threatened by an internecine struggle between two rival traditions religious nationalism and radical secularism Religious nationalism is a form of militaristic hyperpatriotism that imagines the United States as a divine instrument in the final showdown between good and evil Radical secularists fervently deny the positive contributions of the Judeo Christian tradition to the American project and seek to remove all traces of religious expression from the public square Gorski offers an unsparing critique of both demonstrating how half a century of culture war has drowned out the quieter voices of the vital center American Covenant makes the compelling case that if we are to rebuild that vital center we must recover the civil religious tradition on which the republic was founded *The American Reports* ,1872
