Dejmanee, 2022-12-26 This book examines how Asian American women bloggers challenge dominant race and gender discourses through the practice of food blogging Asian American food blogs which situate recipes and food photography within the personal narratives and domestic spaces of Asian American women offer unique insights into the ways that hegemonic race and gender discourses are negotiated in quotidian life The genre's focus on food provides a particularly rich backdrop for this study as it necessarily implicates family histories gendered labour domestic spaces and the power dynamics

of consumption These intimate digital texts therefore provide unique insights into the ways that postfeminist and postrace discourses are encountered in the individual s mundane experiences The author engages a critical cultural analysis of food blogs narratives images communities and platforms expressions of post race and feminism discourses are constrained by the commercial logics of this digital culture The author argues that while Asian American food blogs rarely present a sustained challenge to hegemonic identity representation the processes of reproduction and rupture that define this blogosphere consistently reveal the collective desire to push back against the limits of post identities This is a unique and fascinating study which is ideal reading for students and scholars of gender studies media studies cultural studies and sociology

Feasting Dragon, Starving Eagle Peter G. de Krassel, 2011-01-19 An analysis of how America through its misguided and bankrupt economic financial and foreign policies and alliances has allowed China and its citizens to prosper at the expense and suffering of Americans who are picking up most of the global economic rehabilitation tab The ongoing domestic foreign economic and geopolitical policy failures of career politicians in Washington D C financed by their Wall Street backers and executed by their politically connected incompetent bureaucrats charged with implementing the congressional and presidential non starters are graphically analyzed and described America s career politicians and corporate titans are blamed directly for their stupid and misguided policies While America has spent more than 10 billion to 15 billion a month for five years on the wars in Iraq and Afghanistan and continues to do so China has spent the same amount of money on education developing new technologies and building state of the art infrastructure relevant to the 21st century It doesn t take much to figure out which country made the better investment The 2008 Beijing Olympics where China won more gold medals than the U S are a reaction on how China has raised its game in the daily global competition for economic political and sports supremacy not military China is not a military threat to America China and America differ in their geopolitical and domestic approach and how each country s soldiers must serve their citizens Two visually poignant pictures of which country uses its armed forces more productively are the images of the People s Liberation Army helping the victims of the devastating Sichuan earthquake in 2008 and removing the masses of algae from a beach in Qingdao where the Olympic sailing events took place What a contrast to America scrambling to find emergency personnel to help out in the

aftermath of Hurricane Katrina America is now playing catch up with its economic stimulus package in an effort to continue to be a relevant global inter local power America and China can continue to learn from each other as their people and economies become more intertwined Both countries must join hands to lead the world through climate economic and political change in the 21st century as true political partners to ensure that the world avoids Armageddon

Going Soft? The US and China Go Global Mei Renyi,2014-04-11 What is soft power How can a country acquire and enjoy it Is it the product of public or private initiatives How significant is soft power in world affairs The concept of soft power the idea that international success depends not just upon weaponry force and military coercion but also on admiration and respect for a country's culture and way of life is winning ever greater global attention As China enjoys ever increasing heft on the global scene many Chinese officials seek to emulate the past success of the United States in dominating the world not simply militarily but in terms of influence and prestige Most are very conscious that soft power can be extremely valuable in terms of supplementing and boosting their country's military and strategic position but are often uncertain as to how to deploy the instruments of propaganda and cultural diplomacy most effectively The essays in this volume largely written by scholars based in mainland China represent an extended effort to debate and assess the theoretical concept of soft power and just what it means and how it works in practice The authors focus upon the practical impact and implications of soft power in diverse settings and situations in the United States past and present How they ask does soft power relate to issues of religion gender race and social equality at home and abroad What do American elections and political rhetoric do for American soft power Will China succeed in rivalling the United States in power whether hard soft or smart And how will soft power feature in US China relations present and future
