Homework, Learning and Academic Success: The Role of Family and Contextual Variables Antonio Valle, Susana Rodríguez, Pedro Rosário, Mar Lorenzo Moledo, 2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student s involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student s motivation and the

student's level of engagement with homework. Furthermore, the fact that homework is useful, interesting, and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning. Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework. Lastly, the effectiveness of teacher feedback depends on its contribution to the student's educational progress and how that student will perform in the future. In addition to the student who performs the task and the teacher who prescribes and corrects it, we must not lose sight of parents' role. Although there are discrepancies regarding the role that parents play in relation to homework, it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out. Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties. In this way, providing emotional support, encouraging children to get involved, can contribute positively to improving their motivation and interest in the performance of homework. The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process, its prescription, and correction. Overall, we aim to cease making homework a source of conflict and controversy at the socio-educational level in order to provide useful instruments for improving the quality of student learning. This work was developed with the financing of the research projects EDU2013 44062 P MINECO, EDU2017 82984 P MEIC.

Language and Literacy Connections Geraldine P. Wallach, Elaine Ocampo, 2025-06-02. *Language and Literacy Connections: Intervention for School Age Children and Adolescents*, Second Edition, takes readers on a path of knowledge steeped in principles and practical applications. Integrating language learning and disorders and literacy together in a coherent and cohesive narrative, it covers the challenges facing school-age students from early elementary levels through high school. Using past and current research and interventions from speech language pathology (SLP) and reading and literacy arenas, the authors present transcripts, cases, and detailed intervention sessions to provide a template for daily practice. The text raises questions relating to why am I doing this and provides some answers to this most complex yet basic question. The text has four major goals: 1) to encourage readers to evaluate past and current clinical and educational practices in language intervention at school-age levels; 2) to present intervention goals and activities that are theoretically sound but may require further research scrutiny; 3) to explore aspects of curriculum relevant language intervention for students with language learning disabilities; 4) to provide guidelines for school-based practitioners that clarify how professionals with diverse backgrounds and roles share responsibility in language literacy and academic programming. While taking a strong language disorders perspective, the text would be a useful resource for teachers and other specialists who share students with language learning disabilities (LLD) with their school-based speech language pathologists (SLPs). New to the Second

Edition A new chapter Application Activities to Stretch Your Knowledge includes problems with possible answers and rationales that review significant concepts in language and literacy with a focus on adolescents A roadmap to scenarios and reports and key information at the beginning of the text Application activities in Chapter 10 with icons that highlight easy access to key information and connections with understanding the Whys Key Features Questions at the beginning of each chapter that reflect concerns of SLPs and their teams Projects and assignments that supplement and review the material Examples of teaching modules with practical lesson plans that integrate the role of SLPs in Interprofessional Practices IPP while explicitly addressing the curriculum across a variety of subject areas
