Focusing on computational methods in science, mathematical tools applied to engineering, mathematical modeling, and new aspects of analysis, the book discusses the applications of mathematical modelling in areas such as health science, engineering, computer science, social science, and economics. It also describes a wide variety of analytical, computational, and numerical methods. The conference aimed to foster cooperation between students and researchers in the areas of computational mathematics and engineering sciences and provide a platform for them to share significant research ideas. This book is a valuable resource for graduate students, researchers, and educators interested in the mathematical tools and techniques required for solving various problems arising in science and engineering and understanding new methods and uses of mathematical analysis.

Merging Numeracy with Literacy Practices for Equity in Multilingual Early Year Settings Robyn Jorgensen, Mellony Graven, 2022-01-01 This book draws on both in and out of school literacy practices with teachers and families to enhance the numeracy of early learners. It provides highly illustrative exemplars targeted for learners up to approximately eight years of age whose home language differs from the language of instruction. It identifies the challenges faced by these learners and their families and shares ways of building both literacy and numeracy skills for some of the vulnerable learners nationally and internationally. The book shares the outcomes and strategies for teaching mathematics to early years learners and highlights the importance of literacy practices for learners for whom the language of instruction is different from their home language. Readers will gain a practical sense of how to create contexts, classrooms, and practices to scaffold these learners to build robust understandings of mathematics.

Nonlinear PDEs Guido Schneider, Hannes Uecker, 2017-10-26 This is an introductory textbook about nonlinear dynamics of PDEs with a focus on problems over unbounded domains and modulation equations. The presentation is example oriented and new mathematical tools are developed step by step, giving insight into some important classes of nonlinear PDEs and nonlinear dynamics phenomena which may occur in PDEs. The book consists of four parts. Parts I and II are introductions to finite and infinite dimensional dynamics defined by ODEs and by PDEs over bounded domains respectively, including the basics of bifurcation and attractor theory. Part III introduces PDEs on the real line, including the Korteweg-de Vries equation, the Nonlinear Schrödinger equation, and the Ginzburg-Landau equation. These examples often occur as simplest possible models, namely as amplitude or modulation equations for some real world phenomena such as nonlinear waves and pattern formation. Part IV explores in more detail the connections between such complicated physical systems and the reduced models. For many models, a mathematically rigorous justification by approximation results is given. The parts of the book are

kept as self contained as possible The book is suitable for self study and there are various possibilities to build one or two semester courses from the book **AECon 2020** Saefurrohman, Malim Muhammad, Heri Nurdiyanto ,2021-08-19 The 6th Asia Pasific Education and Science Conference AECON 2020 was conducted on 19 20 December 2020 at Universitas Muhammadiyah Purwokerto Purwokerto Indonesia The Theme of AECON 2020 is Empowering Human Development Through Science and Education The goals of AECON 2020 is to establish a paradigm that emphasizes on the development of integrated education and science though the integration of different life skills in order to improve the quality of human development in education and science around Asia Pacific nations particularly Indonesia **Oswaal CBSE LMP Last Minute Preparation System Class 12 Commerce Stream (Accountancy, Business Studies, Economics, Mathematics & English Core) With board Additional Practice questions For 2024 Board Exams #WinTheBoards** Oswaal Editorial Board,2023-11-27 Description of the product Revision Notes to fill learning gaps Mind Maps Mnemonics for crisp recall Concept Videos for Visual Learnings Board Additional Practice Papers 1 2 for Exam Practice **Mathematical Analysis II: Optimisation, Differential Equations and Graph Theory** Naokant Deo,Vijay Gupta,Ana Maria Acu,P.
