endocytosis of a pathogen by a phagocyte - ANSWER What is one response of the human immune system?

helper T cell - ANSWER what type of white blood cell is involved in the cell-mediated response?

No, the shapes of the surface proteins of each helper T cell are different - ANSWER Are all helper T cells the same?

1. Pathogen is broken apart by chemicals in the phagocyte.
2. A piece of the pathogen is presented on the surface of the phagocyte.
3. The helper T cell binds to the piece of pathogen presented on the phagocyte.
4. Helper T cell disperses a chemical signal to activate other immune response systems. - ANSWER What are the steps of the cell-mediated process?

no; T cells don't interact with pathogens at all. - ANSWER do the helper T cells interact with the free pathogens in the blood?

antigens are the pieces of pathogens that are presented on the surface of a cell - ANSWER what are antigens?

cells that present antigens on their surface; they activate helper T cells to allow the helper T cells to initiate a series of rapid cell divisions - ANSWER what are antigen-presenting cells?

no; some helper T cells don't have the proper surface proteins to be able to bind to the antigen-presenting cell/pathogen. - ANSWER do all types of helper T cells bind to all antigens?

humoral response - ANSWER what is the name of the immune system that involves B cells?

no, just like the T cells, B cells have different shapes of surface proteins - ANSWER Are all B cells the same?

the B cell is binding to an antigen that is still connected to the whole pathogen organism. the T cell didn't bind to the antigen until after it had been broken down in the

Clark, 1995-11-30 In the seventeenth century smallpox reigned as the world's worst killer Luck more than anything else decided who would live and who would die That is until Lady Mary Wortley Montagu an English aristocrat moved to Constantinople and noticed the Turkish practice of ingrafting or inoculation which she wrote made the small pox entirely harmless Convinced by what she witnessed she

allowed her six year old son to be ingrafted and the treatment was a complete success the young Montagu enjoyed lifelong immunity from smallpox Lady Montagu s discovery would however remain a quiet one it would be almost 150 years before inoculation in the more modern form of vaccination would become widely accepted while the medical community struggled to understand the way our bodies defend themselves against disease William Clark s *At War Within* takes us on a fascinating tour through the immune system examining the history of its discovery the ways in which it protects us and how it may bring its full force to bear at the wrong time or in the wrong place Scientists have only gradually come to realize that this elegant defense system not only has the potential to help as in the case of smallpox but also the potential to do profound harm in health problems ranging from allergies to AIDS and from organ transplants to cancer Dr Clark discusses the myriad of medical problems involving the immune system and he systematically explains each one For example in both tuberculosis and AIDS the underlying pathogens take up residence within the immune system itself something Clark compares to having a prowler take up residence in your house crawling around through the walls and ceilings while waiting to do you in He discusses organ transplants showing how the immune system can work far too well and touching on the heated ethical debate over the use of both primate and human organs He explores the mind s powerful ability to influence the performance of the immune system and the speculation that women because they have developed more powerful immune systems in connection with childbearing are more prone than men to contract certain diseases such as lupus In a fascinating chapter on AIDS arguably the most deadly epidemic seen on Earth since the smallpox Clark explains how the disease originated and the ways in which it operates And in each section we learn about the most recent medical breakthroughs At first glance it may appear that our immune system faces daunting odds it must learn to successfully fend off not thousands but millions of different types of microbes Fortunately according to Clark it would be almost impossible to imagine a more elegant strategy for our protection than the one chosen by our immune system and his *At War Within* provides a thorough and engaging explanation of this most complex and delicately balanced mechanism
