

Phases of the Moon

What is a Phase?

Although sometimes the moon seems to be a light in the sky it is not actually the moon that is giving off light. What you see is the sun's light reflecting off the moon's surface. There are 8 different phases of the moon, each phase is unique in meaning a portion of the moon. The chart below describes the different phases of the moon and what they look like from earth.

Moon Phase	Picture	Description
New Moon		When the face of the moon is facing away from the sun and appears to be completely dark.
Waxing Crescent		A small crescent on the left side of the moon is lit, while the rest is dark.
First Quarter		The left half of the moon is lit while the right half is dark.
Waxing Gibbous		The moon is almost completely lit, with a small crescent on the right side that is dark.
Full Moon		When the face of the moon is facing the sun completely and appears to be full.

Waning Gibbous		The moon is almost completely lit with a small crescent on the left side that is dark.
Last Quarter		The right half of the moon is lit while the left half is dark.
Waning Crescent		A small crescent of the right side of the moon is lit while the rest is dark.

Waxing vs. Waning

When the moon goes from being bigger, it is known as waxing. When the moon appears to be getting smaller, it is considered waning.

What is an Eclipse?

A lunar eclipse occurs when the Earth is directly between the moon and the sun, and some of the sun's rays can hit the moon. A solar eclipse occurs when the moon blocks the sun's rays from hitting the Earth entirely. A lunar eclipse can be seen anywhere on the dark side of Earth, but a solar eclipse can only be seen from specific places on Earth.

What is a Lunar Calendar?

A lunar calendar is a calendar that follows the orbit of the moon. It is based on the moon's cycle of roughly 29.5 days. A standard month is made up of 29.5 days, while a lunar month is only made up of 29.5 days. If the lunar calendar were followed for a full 12 months, the year would be about 35 days less than the standard solar year. For this reason, most people do not follow a lunar calendar.
