Fascinating Facts about Phytonutrients in Spices and Healthy Food Louis S. Premkumar, PhD,2014-03

The Science of Weird Shit Chris French,2024-03-19 An accessible and gratifying introduction to the world of paranormal beliefs and bizarre experiences Ghostly encounters alien abduction reincarnation talking to the dead UFO sightings inexplicable coincidences out of body and near death experiences Are these legitimate phenomena If not then how should we go about understanding them In this fascinating book Chris French investigates paranormal claims to discover what lurks behind this weird shit French provides authoritative evidence based explanations for a wide range of superficially mysterious phenomena and then goes further to draw out lessons with wider applications to many other aspects of modern society where critical thinking is

urgently needed Using academic comprehensive logical and at times mathematical approaches The Science of Weird Shit convincingly debunks ESP communicating with the dead and alien abduction claims among other phenomena All the while however French maintains that our belief in such phenomena is neither ridiculous nor trivial if anything such claims can tell us a great deal about the human mind if we pay them the attention they are due Filled with light bulb moments and a healthy dose of levity The Science of Weird Shit is a clever memorable and gratifying read you won't soon forget

Imaginative Science Education Yannis Hadzigeorgiou, 2016-05-26 This book is about imaginative approaches to teaching and learning school science Its central premise is that science learning should reflect the nature of science and therefore be approached as an imaginative creative activity As such the book can be seen as an original contribution of ideas relating to imagination and creativity in science education The approaches discussed in the book are storytelling the experience of wonder the development of romantic understanding and creative science including science through visual art poetry and dramatization However given the perennial problem of how to engage students of all ages in science the notion of aesthetic experience and hence the possibility for students to have more holistic and fulfilling learning experiences through the aforementioned imaginative approaches is also discussed Each chapter provides an in depth discussion of the theoretical background of a specific imaginative approach e.g. storytelling wonder full science reviews the existing empirical evidence regarding its role in the learning process and points out its implications for pedagogy and instructional practices Examples from physical science illustrating its implementation in the classroom are also discussed In distinguishing between participation in a science activity and engagement with science ideas per se the book emphasizes the central role of imaginative engagement with science content knowledge and thus the potential of the recommended imaginative approaches to attract students to the world of science

Language in Deep Human History Richard J. Watts, 2024-02-19 Understanding the evolution of language within the context of deep human history requires interdisciplinary work between linguists and scientists from a wide range of academic disciplines e.g. archaeology molecular biology anthropology genetics biochemistry etc The book aims to calibrate work on human evolution with current linguistic theory in an attempt to trace out a scientific story of how human language emerged and developed that has plausibility while remaining open to change through new linguistic and non linguistic research

The Emergence and Development of Scientific Thinking during the Early Years: Basic Processes and Supportive Contexts Ageliki Nicolopoulou, Amanda C. Brandone, Stella Vosniadou, Christopher Osterhaus, 2021-03-29 *The Global Politics of Science and Technology - Vol. 2* Maximilian

Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology The second volume raises a plethora of issue areas actors and cases under the umbrella notion techno politics Distinguishing between interactional and co productive perspectives it outlines a toolbox of analytical frameworks that transcend technological determinism and social constructivism Soils and Human Health Eric C. Brevik, Lynn C. Burgess, 2012-12-12 Despite the connections between soils and human health there has not been a great amount of attention focused on this area when compared to many other fields of scientific and medical study Soils and Human Health brings together authors from diverse fields with an interest in soils and human health including soil science geology geography bio **Saving More Than Seeds** Catherine Phillips, 2016-04-01 Saving More Than Seeds advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socionatural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures Wearable Technology and Mobile Innovations for Next-Generation Education Holland, Janet, 2016-04-08 Advances in technology continue to alter the ways in which we conduct our lives from the private sphere to how we interact with others in public As these innovations become more integrated into modern society their applications become increasingly relevant in various facets of life Wearable Technology and Mobile Innovations for Next Generation Education is an authoritative reference source on the development and implementation of wearables within learning and training environments emphasizing the valuable resources offered by these advances Focusing on technical considerations lessons learned and real world examples this book is ideally designed for instructors researchers upper level students and policy makers interested in the effectiveness of

wearable applications **Reimagining the Human in Contemporary French Science Fiction** Christina Lord, 2023-04-15

The study of French science fiction even in France remains an underexploited field Only recently have French literary scholars been able to gain recognition for the validity of studying SF but their works are often literary histories This is the first book length study to take into account both French and Anglo American intellectual trends theories and SF scholarship and apply them to a corpus of French works It shows how contemporary French SF imagines two broad philosophical inquiries into the powerful yet terrifying geological age of the Anthropocene posthumanism and transhumanism While the posthumanist perspective calls attention to the interdependence and co evolution of humans and nonhumans within a complex ecosystem of life the transhumanist view of coping with the Anthropocene offers more pragmatic tool based solutions rather than a reworking of the human imagination Given the history of philosophical thought s entanglement with literature in France French SF can tell us a lot about this existential crisis of Anthropos as both destroyer and savior of worlds and bodies alike With a focus on encounters between humans nonhumans and posthumans in selected works this book investigates both the immaterial the psychological state of the mind and material the body stakes of posthumanist or transhumanist thinking in French SF

The Scientific Attitude Lee McIntyre, 2020-04-07 This intelligent treatise articulates why the pursuit of scientific truths even if inevitably flawed matters in our post truth world Publishers Weekly

What separates science from other disciplines An attitude that respects evidence and is willing to evolve as new evidence arises Attacks on science have become commonplace Claims that climate change isn t settled science that evolution is only a theory and that scientists are conspiring to keep the truth about vaccines from the public are staples of some politicians rhetorical repertoire Defenders of science often point to its discoveries penicillin relativity without explaining exactly why scientific claims are superior In this book Lee McIntyre argues that what distinguishes science from its rivals is what he calls the scientific attitude caring about evidence and being willing to change theories on the basis of new evidence The history of science is littered with theories that were scientific but turned out to be wrong the scientific attitude reveals why even a failed theory can help us to understand what is special about science In this book McIntyre explores Historical cases that illustrate both scientific success and failure The transformation of medicine from a practice based on hunches to a science based on evidence Scientific fraud and ideology driven denialists pseudoscientists and skeptics How social science should embrace the scientific attitude Ultimately McIntyre says the grounding of science in evidence offers a uniquely powerful tool in the defense of science itself
