Shopping 3.0 Cor Molenaar,2016-04-01 Retailers are in difficult times The recession global competition government regulation and the growth of the Internet mean that costs are rising but margins are increasingly squeezed Cor

Molenaar's Shopping 3.0 offers an engaging convincing and well researched manifesto for the future of retailing a manifesto which encourages retailers to switch their approach from a strategy that is based around transactions to one that is based around customers. Logic dictates that there is no one single strategy that will work for all retailers some of them may indeed benefit from investing in e retailing solutions and the Internet but for others success will lie in developing a service based on customer experience or one with some apparently bespoke elements a strategy to appeal to customers as individuals. Shopping 3.0 examines all these changes. It sketches the world of consumers those who make their purchases from the comfort of their armchair and those who enjoy shopping with friends. Cor Molenaar explores the impact of changing consumer attitudes to shopping the role of new technology in future retailing and the changing face of both city centre and out of town shops and malls. Shopping 3.0 offers a welcome helping hand for retailers both physical and web based shopkeepers something to help you make sense of the ongoing revolution in shopping and to plan or adjust your business strategy to enable you not just to survive but to thrive in a world that will look very different in a few years time. **BTEC National Travel & Tourism** Gillian Dale, 2005 Closely matched to the specifications this student book is the only resource available for BTEC national travel and tourism.
