MEDICINE

Prostate Cancer is one of the most common cancers in the United States (ACS 2022, Rawla 2019). The lifetime risk of a prostate cancer diagnosis is about 1 in 8 and the risk of dying from prostate cancer is about 1 in 41 (ACS 2022).

The American Urological Association recommends shared decision making but endorses that the greatest benefit for screening is in men aged 55 to 70, of average risk (AUA 2018). It is not recommended to screen over the age of 70 (AUA 2018, USPSTF 2018)
