The United States of America, land of the free, home of the brave, but also the one and only place where you can find the American dream. The United States still gives the chance to everyone who makes it to this land to attain the American dream. The first chance if you're young enough is when you go into our public school system and you get the chance at a scholarship to college, to which for most people "going to college" is the American Dream because the education provides with a decent job and money. There are other ways to get to the American Dream such as going into one of our higher paying job opportunities.

There are even ways to go from "zero to hero" (Hercules reference) like going from the lowest job in the store too eventually being the manager of the whole thing, here in The United States of America it is possible to rise through the ranks when given the time to do so. The American Dream is still here and there are still many ways to get to it. To begin this "argument" on whether the American Dream is still made here in America and not in Vietnam or some other country, we can look at our education system.

Education too many people is the American dream because it can give you a job and it can give you Knowledge. The education system of The United States may seem to be inferior compared to the school systems of places like South Korea and many other developed countries that have high standards for their students. But not all the kids in those countries have a shot at going to school which makes our country different from theirs, not all kids in these countries have money to go to school or they don't live near one, which is what makes our country far different from these others.

Our public school system is free and widespread which gives every child a chance at getting the American dream. "We can make sure that every child in America has a decent shot at life, and that the doors of opportunity remain open to all," (Barack Obama Keynote Address Page 85) those words uttered by Barack Hussein Obama President of the United States of America show how American children all have a decent opportunity at life and the American Dream through education.

Even if you didn't gain your American Dream through our schooling system you can still accomplish your financial goals through working here in The United States. It is possible here in the United States to get anything you want as long as you have enough

Scott, Foresman Springboard for Passing the GED Writing Skills Test Carole Thompson, Linda Barnes, 1987

Recovering 9/11 in New York Robert Fanuzzi, Michael Wolfe, 2014-04-23 This collection of essays offers a rich variety of approaches to how people and institutions in greater New York have sought to find meaning in the 9/11 attacks on the World Trade Center now a decade on. The views and practices documented here join memory recovery and rebuilding together to form a vital new chapter in New York's metropolitan history. Contributors contest the dominant nationalist narrative about 9/11 to generate a more local and socially engaged form of scholarship that connects directly with the experiences of people who lived or came to work in New York that fateful day and the years that followed. In doing so, these essays give academics and clinical professionals an opportunity to reflect upon and work with the people of a community in this case metropolitan New York as essential partners and even the main protagonists in creating new paradigms to capture the significance of these events and their aftermath. The collection is comprised of sixteen essays by experts drawn from a wide range of scholarly and professional fields. They investigate how people across the New York metropolitan region initially responded to and have since remembered the events of September 11th as they rippled out into the city, the surrounding metropolitan region, and the nation at large. They engage directly with the emotional and psychological aftermath of the attacks, approaching the questions of healing and teaching from a variety of institutional, professional, and non-professional perspectives. The volume concludes with a selection of essays that grapple with the challenge of representing 9/11. Contributors to this section evaluate contemporary novels and films that have risked engagement with deep narrative traditions to translate the recent memory of public events into resonant stories and imaginative language. Readers are invited to consider how all these responses in literature, memorials, media representations, and the words and actions of diverse individuals still contribute to the complex yet inescapable challenge of making meaning of 9/11. *American Writers* Leonard Unger, A.
