Database Repairing and Consistent Query Answering Leopoldo Bertossi, 2022-05-31 Integrity constraints are semantic conditions that a database should satisfy in order to be an appropriate model of external reality In practice and for many reasons a database may not satisfy those integrity constraints and for that reason it is said to be inconsistent However and most likely a large portion of the database is still semantically correct in a sense that has to be made precise After having provided a formal characterization of consistent data in an inconsistent database the natural problem emerges of extracting that semantically correct data as query answers The consistent data in an inconsistent database is usually characterized as the data that persists across all the database instances that are consistent and minimally differ from the inconsistent instance Those are the so called repairs of the database In particular the consistent answers to a query posed to the inconsistent database are those answers that can be simultaneously obtained from all the database repairs As expected the notion of repair requires an adequate notion of distance that allows for the comparison of databases with respect to how much they differ from the inconsistent instance On this basis the minimality condition on repairs can be properly formulated In this monograph we present and discuss these fundamental concepts different repair semantics algorithms for computing consistent answers to queries and also complexity theoretic results related to the computation of repairs and doing consistent query answering Table of Contents Introduction The Notions of Repair and Consistent Answer Tractable CQA and Query Rewriting Logically Specifying Repairs Decision Problems in CQA Complexity and Algorithms Repairs and Data Cleaning

Flexible Query Answering Systems Troels Andreasen, 2002-10-14 This book constitutes the refereed proceedings of the 5th International Conference on Flexible Query Answering Systems FQAS 2002 held in Copenhagen Denmark in October 2002 The 29 revised full papers presented were carefully reviewed and selected for inclusion in the proceedings Among the fields covered are database management information retrieval domain modeling knowledge representation and ontologies knowledge discovery and data mining artificial intelligence classical and nonclassical logics computational linguistics natural language processing multimedia information systems and human computer interaction

Interface Paul R. Laska, 2011-08-19 A wide variety of professionals find themselves intimately involved in the criminal justice system firefighters emergency medical providers nurses physicians public health personnel environmental professionals public works personnel and many others No previous work has attempted to address the criminal justice system in terms relevant to these professionals Interface A Guide for Professionals Supporting the Criminal Justice System explains the system provides the reader with guidance to documenting incidents so that the data is both of value to the professional in the future and for use by the other components of the system Further this volume presents evidence from the aspect of these professionals their needs in handling evidence and basics of collection and preservation for those instances where it falls to them to do so Professionals not familiar with safety issues outside of their fields of expertise have been

injured or died as a result of exposure to hazards it also educates them to considerations for their safety when out of their area of comfort In addition this book considers the role of the professional as interviewer and provides basic guidance to this often valuable skill Finally Interface attempts to make the professional knowledgeable and comfortable in the courts especially on the stand where the professional may appear as a witness or even as an expert **Flexible Query Answering Systems** Henrik Legind Larsen,1998 This book constitutes the thoroughly refereed post workshop proceedings of the Third International Conference on Flexible Query Answering Systems FQAS 98 held in Roskilde Denmark in May 1998 The 32 revised papers presented were carefully reviewed and went through two rounds of selection for inclusion in the proceedings This book is the first one focused on flexible query answering systems this emerging area of research and development builds on results from mathematical logic fuzzy logic various database paradigms information retrieval linguistics and human computer interaction The papers deal with issues occurring in querying databases and the Internet **Semantics in Databases** Leopoldo Bertossi,Gyula O.H. Katona,Klaus-Dieter Schewe,Bernhard Thalheim,2003-04-07 This book constitutes the thoroughly refereed post proceedings of the Second International Workshop on Semantics in Databases held in Dagstuhl Castle Germany in January 2001 The 10 revised full papers presented together with an introduction by the volume editors were carefully selected during two rounds of reviewing Among the aspects of database semantics discussed are semantic constraints paraconsistency logic foundations of databases ER modeling type hierarchies null values consistency enforcement logic based pattern languages and semantic classification of queries Among the classes of databases dealt with are deductive databases relational databases distributed information systems and tree structured data **Cyber Security of Industrial Control Systems in the Future Internet Environment** Stojanović, Mirjana D.,Boštjančič Rakas, Slavica V.,2020-02-21 In today s modernized market many fields are utilizing internet technologies in their everyday methods of operation The industrial sector is no different as these technological solutions have provided several benefits including reduction of costs scalability and efficiency improvements Despite this cyber security remains a crucial risk factor in industrial control systems The same public and corporate solutions do not apply to this specific district because these security issues are more complex and intensive Research is needed that explores new risk assessment methods and security mechanisms that professionals can apply to their modern technological procedures Cyber Security of Industrial Control Systems in the Future Internet Environment is a pivotal reference source that provides vital research on current security risks in critical infrastructure schemes with the implementation of information and communication technologies While highlighting topics such as intrusion detection systems forensic challenges and smart grids this publication explores specific security solutions within industrial sectors that have begun applying internet technologies to their current methods of operation This book is ideally designed for researchers system engineers managers networkers IT professionals analysts academicians and students seeking a better understanding of the key issues within securing industrial control systems that utilize internet technologies **Phonology**

Charles W. Kreidler, 2001 *Phonology Critical Concepts* the first such anthology to appear in thirty years and the largest ever published brings together over a hundred previously published book chapters and articles from professional journals These have been chosen for their importance in the exploration of theoretical questions with some preference for essays that are not easily accessible Divided into sections each part is preceded by a brief introduction which aims to point out the problems addressed by the various articles and show their relations to one another

Logic Programming and Automated Reasoning Andrei Voronkov, 1992-07 This volume contains the proceedings of LPAR 92 the international conference on logic programming and automated reasoning held in St Petersburg in July 1992 The aim of the conference was to bring together researchers from the Russian and the international logic programming and theorem proving communities The topics of interest covered by papers in the volume include automated theorem proving non monotonic reasoning applications of mathematical logic to computer science deductive databases implementation of declarative concepts and programming in non classical logics LPAR 92 is the successor of the First and Second Russian Conferences on Logic Programming held in 1990 and 1991 respectively the proceedings of which were published in LNAI Vol 592

Invention Of Integrated Circuits: Untold Important Facts Arjun N Saxena, 2009-03-23 This book is the first to give an authoritative and comprehensive account of the invention of Integrated Circuits ICs from an insider who had participated and contributed from the beginning of their invention and advancement to the Ultra Large Scale ICs ULSICs of today It reads like a mystery novel to engross the reader but it is not based on fiction it gives documented facts of the invention of ICs analyzes the patents and highlights additional details and clarifications of their history In addition the book clarifies the Nobel Prize award and raises intriguing questions which as yet remain unanswered even after about half a century since the ICs were invented This is the invention which has revolutionized the whole world forever

Current Trends in Database Technology - EDBT 2006 Torsten Grust, Hagen Höpfner, Arantza Illarramendi, Stefan Jablonski, Marco Mesiti, Sascha Müller, Paula-Lavinia Patranjan, Kai-Uwe Sattler, Myra Spiliopoulou, Jef Wijsen, 2006-10-17 This book constitutes the thoroughly refereed joint post proceedings of nine workshops held as part of the 10th International Conference on Extending Database Technology EDBT 2006 held in Munich Germany in March 2006 The 70 revised full papers presented were selected from numerous submissions during two rounds of reviewing and revision
