CHAPTER ONE LINEAR MOTION

Introduction

Study of motion is divided into two;

1. Kinematics
2. Dynamics

In kinematics forces causing motion are disregarded while dynamics deals with motion of objects and the forces causing them.

I. Displacement

Distance moved by a body in a specified direction is called displacement. It is denoted by letter 's' and has both magnitude and direction. Distance is the movement from one point to another. The SI unit for displacement is the metre (m).

II. Speed

This is the distance covered per unit time.

Speed= distance covered/ time taken. Distance is a scalar quantity since it has magnitude only. The SI unit for speed is metres per second (m/s or ms^{-1})

Average speed= total distance covered/total time taken

Other units for speed used are Km/h.

Examples

1. A body covers a distance of 10m in 4 seconds. It rests for 10 seconds and finally covers a distance of 50m in 60 seconds. Calculate the average speed.

Solution

Total distance covered=10+50=100m

Total time taken=4+10+6=20 seconds

Therefore average speed=100/20=5m/s

2. Calculate the distance in metres covered by a body moving with a uniform speed of 180 km/h in 30 seconds.

Solution

Distance covered=speed*time

$$=180 \times 1000 / 60 \times 60 = 50 \text{ m/s}$$

$$=50 \times 30$$

$$=1,500 \text{ m}$$

3. Calculate the time in seconds taken a by body moving with a uniform speed of 360km/h to cover a distance of 3,000 km?

Solution

Speed: 360 km/h= $360 \times 1000 / 60 \times 60 = 100 \text{ m/s}$

Time=distance/speed

$$3000 \times 1000 / 100$$

$$=30,000 \text{ seconds.}$$

III. Velocity

This is the change of displacement per unit time. It is a vector quantity.

Velocity=change in displacement/total time taken

The SI units for velocity are m/s

Answers To Minds On Physics:

Minds on Physics William J. Leonard, 1999 There is one Teacher's Guide which corresponds with each Student Activities Book and consists of two parts Answers and Instructional Aids for Teachers and Answer Sheets The Answers and Instructional Aids for Teachers provides advice for how to optimize the effectiveness of the activities as well as brief explanations and comments on each question in the student activities The Answer Sheets may be duplicated and distributed to students as desired Use of the Answer Sheets is particularly recommended for activities requiring a lot of graphing or drawing The Mechanical Mind Tim Crane, 2015-12-22 How can the human mind represent the external world What is thought and can it be studied scientifically Should we think of the mind as a kind of machine Is the mind a computer Can a computer think Tim Crane sets out to answer these questions and more in a lively and straightforward way presuming no prior knowledge of philosophy or related disciplines Since its first publication The Mechanical Mind has introduced thousands of people to some of the most important ideas in contemporary philosophy of mind Crane explains the fundamental ideas that cut across philosophy of mind artificial intelligence and cognitive science what the mind body problem is what a computer is and how it works what thoughts are and how computers and minds might have them He examines different theories of the mind from dualist to eliminativist and questions whether there can be thought without language and whether the mind is subject to the same causal laws as natural phenomena The result is a fascinating exploration of the theories and arguments surrounding the notions of thought and representation This third edition has been fully revised and updated and includes a wholly new chapter on externalism about mental content and the extended and embodied mind There is a stronger emphasis on the environmental and bodily context in which thought occurs Many chapters have been reorganised to make the reader's passage through the book easier The book now contains a much more detailed guide to further reading and the chronology and the glossary of technical terms have also been updated The Mechanical Mind is accessible to anyone interested in the mechanisms of our minds and essential reading for those studying philosophy of mind philosophy of psychology or cognitive psychology

Matters of the Mind William Lyons, 2020-11-25 This book presents a popular and authoritative account of the dramatically different ways in which philosophers have thought about the mind over the last hundred years It explores the effect of the major turning points in recent western philosophy as well as the influence of the leading figures

Mind, Matter, and Quantum Mechanics Henry P. Stapp, 2013-03-09 Nature appears to be composed of two completely different kinds of things rocklike things and idealike things The first is epitomized by an enduring rock the second by a fleeting thought A rock can be experienced by many of us together while a thought seems to belong to one of us alone Thoughts and rocks are intertwined in the unfolding of nature as Michelangelo's David so eloquently attests Yet it is possible to understand rationally how two completely different kinds of things can interact with each other Logic says no and history confirms that verdict To form a rational comprehension of the interplay between the matterlike and mind like parts of nature these two

components ought to be understood as aspects of some single primal stuff But what is the nature of a primal stuff that can have mind and matter as two of its aspects An answer to this age old question has now been forced upon us Physicists probing ever deeper into the nature of matter found that they were forced to bring into their theory the human observers and their thoughts Moreover the mathematical structure of the theory combines in a marvelous way the features of nature that go with the concepts of mind and matter Although it is possible in the face of this linkage to try to maintain the traditional logical nonrelatedness of these two aspects of nature that endeavor leads to great puzzles and mysteries **Mind,**

Consciousness, Body Robert G. Howard, 2012-08-31 Good news at last here are new and exact descriptions of the mind consciousness body reality time nervous system taxonomy Feel the stimulation of your curiosity into the ancient questions about the mind body duality as you plan your research and publication program How reality and three time dimensions emerge from the mind and consciousness Easy to understand mathematical definitions of otherwise ambiguous terms Each of fifty hypotheses will inspire you to publish more than your peers Introducing all the recommendations you will need to design an experiment or a research project which will propel you to the credible and prestigious forefront of your field Exact scientific answers to the problem of mind consciousness body are easily worth 4 hours of reading These solutions will kick off your numerous insightful publications The price of this book will yield massive funding for years of your research The math is reduced to the bare minimum and is explained in detail so the reader can use it in his own publications The mathematics is treated as an abbreviated language which is translated into natural language A Mind Always in Motion Emilio

Segrè, 1993-01-01 The renowned physicist Emilio Segrè 1905-1989 left his memoirs to be published posthumously because he said I tell the truth the way it was and not the way many of my colleagues wish it had been This compelling autobiography offers a personal account of his fascinating life as well as candid portraits of some of this century's most important scientists such as Enrico Fermi E O Lawrence and Robert Oppenheimer Born in Italy to a well-to-do Jewish family Segrè showed early signs of scientific genius at age seven he began a notebook of physics experiments He became Fermi's first graduate student in 1928 and contributed to the discovery of slow neutrons and later was appointed director of the physics laboratory at the University of Palermo While visiting the Radiation Laboratory at Berkeley in 1938 he learned that he had been dismissed from his Palermo post by Mussolini's Fascist regime Lawrence then hired him to work on the cyclotron at Berkeley with Luis Alvarez Edwin McMillan and Glenn Seaborg Segrè was one of the first to join Oppenheimer at Los Alamos where he became a group leader on the Manhattan Project His account of that mysterious enclave of scientists all working feverishly to develop the atomic bomb before the Nazis did includes his description of the first explosion at Alamogordo Segrè writes movingly of the personal devastation wrought by the Nazis his struggles with fellow scientists and his love of nature His book offers an intimate glimpse into a bygone era as well as a unique perspective on some of the most important scientific developments of this century **Wisdom Without Answers** Daniel Kolak, Raymond Martin, 1991 This widely acclaimed book successfully

solves both problems of motivation and preparation mentioned above **Quanta and Mind** J. Acacio de Barros, Carlos Montemayor, 2019-09-19 This edited volume examines aspects of the mind consciousness that are relevant to the interpretations of quantum mechanics In it an international group of contributors focus on the possible connections between quantum mechanics and consciousness They look at how consciousness can help us with quantum mechanics as well as how quantum mechanics can contribute to our understanding of consciousness For example what do different interpretations aimed at solving the measurement problem in quantum mechanics tell us about the nature of consciousness such as von Neumann's interpretation Each interpretation has associated to it a corresponding metaphysical framework that helps us think about possible models of consciousness Alternatively what does the nature of consciousness tell us about the role of the observer and time reversibility in the measurement process The book features 20 papers on contemporary approaches to quanta and mind It brings together the work of scholars from different disciplines with diverse views on the connections between quanta and mind ranging from those who are supportive of a link between consciousness and quantum physics to those who are very skeptical of such link Coverage includes such topics as free will in a quantum world contextuality and causality mind and matter interaction quantum panpsychism the quantum and quantum like brain and the role of time in brain mind dynamics *The Well-Trained Mind* Susan Wise Bauer, Jessie Wise, 2024-04-02 The classic handbook on home schooling updated for a new generation of parents and students Is your child getting lost in the system becoming bored losing his or her natural eagerness to learn If so it may be time to take charge of your child's education by doing it yourself The Well Trained Mind will instruct you step by step on how to give your child an academically rigorous comprehensive education from preschool through high school one that will train him or her to read to think to understand to be well rounded and curious about learning Veteran home educator Susan Wise Bauer outlines the classical pattern of education called the trivium which organizes learning around the maturing capacity of the child's mind and comprises three stages the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules the middle school logic stage in which the student begins to think more analytically and the high school rhetoric stage where the student learns to write and speak with force and originality Using this theory as your model you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects A new optional Resource Recommendations Portal provides subscribers with curated lists of the best curricula for every grade level and learning style Thousands of parents have already used the methods described in The Well Trained Mind to create a truly superior education for children in their care You do have control over what and how your child learns The Well Trained Mind will give you the tools you'll need to teach your child with confidence and success **Mind**, 1883 A quarterly review of philosophy
