(Chapter – 1) (Variations in Psychological Attributes) (Important Questions)

(Class – XII)

Question 5:

Please describe the following psychological characteristics.

(i) Intelligence

(ii) Aptitude

✍️ **Answer 5:**

(i) **Intelligence:** The global ability to understand the world, think rationally, and use available resources effectively when faced with challenges. Intelligence tests provide a global measure of an individual's overall cognitive ability, including the ability to benefit from schooling. In general, students with low intelligence are less likely to do well on school-related exams, but their success in life is not tied solely to intelligence on exam results.

(ii) **Aptitude:** refers to an individual's potential to acquire a skill. Aptitude tests are used to predict what a person with the right environment and training can do. People with high aptitude for machines can play an active role as engineers by receiving appropriate training. Similarly, people with good language skills can be trained to become good writers.

Question 6:

Please use an example to distinguish between concurrent and serial processing.

✍️ **Answer 6:**

Concurrency: When you know how to create relationships between different concepts and put them together to form something meaningful, it is called concurrency. For example, consider Raven's Progressive Matrix (RPM) test. For this test, a model is given and the parts that need repair are removed. You will be asked to choose one of six options that best complement your design. **Sequential processing:** Sequential processing is when you know all the steps and required information in order and one leads to another search. For example, learning continuous processing such as numbers, alphabets, and multiplication tables.

Question 7:

How can you distinguish between verbal and ability tests of intelligence?

✍️ **Answer 7:**

Oral Exam: An oral exam includes oral or written responses. This test is conducted on literate people as it needs the individual to write or talk.

Performance Test: Performance test includes a task wherein the individual requires to manipulate or change the material to get this task done can be conducted on individuals from different cultures and does not include any writing process.

Question 8:

Which do you think is related to success in life, IQ or EQ? Why?

✍️ **Answer 8:**

EQ stands for Emotional Intelligence Quotient and IQ stands for Intelligence. EQ makes people successful. According to research by psychologists with EQ, the benefits include:

Responding to students affected by stresses and challenges in the outside world. Academic success. Encourage cooperative behavior and reduce anti-social activity. Prepare students for the challenges of life outside the classroom.
