The Impact of COVID-19 on Early Childhood Education and Care Jyotsna Pattnaik, Mary Renck Jalongo, 2022-07-07 This collection brings together a diverse group of scholars from throughout the world who have grappled with and investigated the impact of the COVID 19 crisis on the lives of young children. Profound changes have occurred in all facets of early childhood education and care. ECEC Young children and their families, college students enrolled in teacher preparation programs, inservice teachers, caregivers, and postsecondary faculty have endured prolonged periods of quarantine, disruption, stress, and grief precipitated by the pandemic. These consequences have been even more challenging for individuals and groups who were already struggling or marginalized prior to the advent of the coronavirus. Collectively, the chapter authors draw upon findings from their research and insights gleaned from professional experiences to recommend ways of providing high quality programs despite persistent global health threats.

Applications of Metaverse and Virtual Reality to Creative Education and Industry Dana M. Barry, Hideyuki Kanematsu, 2025-05-04 This book provides excellent examples of metaverse and virtual reality and their unlimited possibilities for education and industry. By examining innovative educational activities in both real and virtual worlds such as Second Life SL, a three dimensional world where avatars perform specific tasks on behalf of us, we get a unique perspective on how these technologies can revolutionize learning and professional practices. Metaverse offers a fully immersive and interconnected virtual environment enabling individuals to engage in digital experiences that closely resemble real world interactions, thereby providing limitless possibilities for education and industry. In addition, the chapters cover various key topics including the integration of virtual reality in creative game design, the use of VR, virtual reality headsets with sensor glasses for physiological data collection, and the application of VR in fields like architecture and medical education. Artificial Intelligence, Robotics, and Machine Learning, along with other related fields, are also mentioned. In addition, readers will encounter discussions about the future fusion of real and virtual worlds, highlighting the role of Digital Twin Technology and Augmented Reality. The book invites readers to consider critical questions about the implications of these technologies for society and industry. This book is a must read for students, educators, engineers, and researchers interested in the cutting edge applications of virtual reality and the metaverse. It serves as a textbook reference and practical guide, making it invaluable for academic audiences and professionals seeking to harness the power of these technologies for innovative solutions. Whether you are a professor, scientist, or engineer, or simply curious about the metaverse, avatars, and virtual reality, this book promises to be a rewarding journey into the limitless potential of these technologies for creative education and industry.
