Revolution Z. Bechler, 2012-12-06 Three events which happened all within the same week some ten years ago set me on the track which the book describes The first was a reading of Emile Meyerson works in the course of a prolonged research on Einstein's relativity theory which sent me back to Meyerson's Identity and Reality where I read and reread the striking chapter on Irrationality In my earlier researches into the origins of French Conventionism I came to know similar views all apparently deriving from Emile Boutroux's doctoral thesis of 1874 De la contingence des lois de la nature and his notes of the 1892-3 course he taught at the Sorbonne De l'idée de loi naturelle dans la science et la philosophie contemporaines But never before was the full effect of the argument so suddenly clear as when I read Meyerson On the same week I read by sheer accident Ernest Moody's two parts paper in the JH of 1951 Galileo and Avempace Put near Meyerson's thesis what Moody argued was a striking confirmation it was the sheer irrationality of the Platonic tradition leading from Avempace to Galileo which was the working conceptual force behind the notion of a non appearing nature active all the time but always submerged as it is embodied in the concept of void and motion in it **Resources in Education**, 1998 **Innovative**
