The landscape is composed of various shades of blue, green, and yellow, suggesting a stylized or digital environment. The aircraft is positioned in the upper half of the image, with its wings and engines clearly visible. Mathematics Entertainment For The Millions Alfred S Posamentier, 2020-07-21

The physical form of this new title is pleasing including good paper readable font and durable binding The book is not a collection of practical ideas Rather it is intended for those curious about pure mathematical tidbits The flavor is light as opposed to pedantic Among the numerous books of this type this title is significantly better than most It should be considered for private collections and for libraries that can afford to serve a small unique readership Summing Up Recommended General readers CHOICE This book demonstrates to the general audience that mathematics can be entertaining and fun rather than the sad reputation it has gained over decades from uninspired school instruction that is often devoid of enrichment or motivational considerations The book is designed in such a way that a reader will need almost no special preparation in mathematics but to recall some of the most basic concepts that were taught at the lower secondary grade level Yet by the same token the book will hopefully open up doors for those less motivated in mathematics to interest readers to investigate some of the topics presented and thereby enhance their knowledge of mathematics something most general readers will not initially find possible but we hope will be an end product of this book
