Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection **Genetic Information** Alison K. Thompson, Ruth F. Chadwick, 2007-07-23 It is difficult to think of an example of an advancement in the biological sciences that has had an impact on society similar to that of the new genetics Recent developments in biotechnology have occasioned much discussion among academics professionals and lay people alike In particular many questions and concerns have arisen over the acquisition access and control of genetic information There are several reasons why the new genetics has commanded such widespread attention and why it is now the subject of considerable debate Special reference is given in this volume to the implications of genetic information for five different subject areas eugenics the insurance industry the commercialisation of genetic testing strategies for raising public awareness and the value of theoretical ethical and sociological frameworks in the debate This diverse collection of papers attempts to address and critically discuss issues surrounding the control of and access to genetic information from ethical medical legal and theoretical points of view The first and shortest section of the book attempts to address concerns over the eugenic potential of new biotechnologies It also provides a historical context for

the debate for controversy over the subject of eugenics predates the current debate over genetic information by a considerable length of time Indeed by the time the first patent was issued for Chakrabarty's strain of oil eating bacteria in the early 1970s the term eugenics had already acquired strong pejorative connotations
