Native Americans from different North America had or have different customs, rituals, each of which developed in different places and traditions. A custom is the specific way a ritual is passed on through something. This can include how things are prepared, what clothing is worn, the type of celebrations and ritual acts. The ritual systems, developed and shared by a culture over time is a tradition.

A culture's customs are often determined by the values and beliefs held in that environment. In the Eastern Woodland region, with weaving developed as a custom. The people used to make things like baskets, clothing, weaving was a way of making the most of nothing without using animal skins. In the Eastern Woodlands area, however, hunting and fishing are daily activities. Food is easy to get around here, developing into weaving was not important.

The traditions of men and women in the same time period as well. In hunting culture, men were often seen from their hunting. The day to hunt, women were often seen from their weaving. The village where they were born. The culture where they were born. It was a way of life, the traditions.

Traditions are an important part of Native American culture. They tell stories, language. Telling the story's stories only was the way they passed on their lives, generation to generation. They would not be lost. The story was telling, celebrating and singing a way to remember the tribe's history. The stories told the tribe's history, family adventures and accomplishments. The story was told to the people of the time.

Religion was an important part of Native American culture. The celebration of the tribe's life and living when it was a good time. The celebration was a common way to give thanks to the tribe's gods for a good crop. Some celebrations included singing songs and dancing with animal sacrifices. The celebrations reinforced the people's faith in their gods' ability to provide for their needs.

The Babylonian Talmud and Late Antique Book Culture Monika Amsler, 2023-04-06 In this book Monika Amsler explores the historical contexts in which the Babylonian Talmud was formed in an effort to determine whether it was the result of oral transmission. Scholars have posited that the rulings and stories we find in the Talmud were passed on from one generation to the next, each generation adding their opinions and interpretations of a given subject. Yet such an oral formation process is unheard of in late antiquity. Moreover, the model exoticizes the Talmud and disregards the intellectual world of Sassanid Persia. Rather than taking the Talmud's discursive structure as a sign for orality, Amsler interrogates the intellectual and material prerequisites of composers of such complex works and their education and methods of large-scale data management. She also traces and highlights the marks that their working methods inevitably left in the text. Detailing how intellectual innovation was generated, Amsler's book also sheds new light on the content of the Talmud. This title is also available as Open Access on Cambridge Core.
