the SAT Includes practice tests Evolutionary Criminology Russil Durrant,Tony Ward,2015-03-12 In our attempts to understand crime researchers typically focus on proximate factors such as the psychology of offenders their developmental history and the social structure in which they are embedded While these factors are important they don t tell the whole story Evolutionary Criminology Towards a Comprehensive Explanation of Crime explores how evolutionary biology adds to our understanding of why crime is committed by whom and our response to norm violations This understanding is important both for a better understanding of what precipitates crime and to guide approaches for effectively managing criminal behavior This book is divided into three parts Part I reviews evolutionary biology concepts important for understanding human behavior including crime Part II focuses on theoretical approaches to explaining crime including the evolution of cooperation and the evolutionary history and function of violent crime drug use property offending and white collar crime The developmental origins of criminal behavior are described to account for the increase in offending during adolescence and early adulthood as well as to explain why some offenders are more likely to desist than others Proximal causes of crime are examined as well as cultural and structural processes influencing crime Part III considers human motivation to punish norm violators and what this means for the development of a criminal justice system This section also considers how an evolutionary approach contributes to our understanding of crime prevention and reduction The section closes with an evolutionary approach to understanding offender rehabilitation and reintegration Reviews how evolutionary findings improve our understanding of crime and punishment Examines motivations to offend and to punish norm violators Articulates evolutionary explanations for adolescent crime increase Identifies how this knowledge can aid in crime prevention and reduction and in offender rehabilitation Evolution Challenges Karl S. Rosengren,2012-04-25 This book goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact focusing on a wide range of cognitive socio cultural and motivational factors that make concepts such as evolution difficult to grasp The Evolution and Fossil Record of Parasitism Kenneth De Baets,John Warren Huntley,2022-01-01 This two volume edited book highlights and reviews the potential of the fossil record to calibrate the origin and evolution of parasitism and the techniques to understand the development of parasite host associations and their relationships with environmental and ecological changes The book deploys a broad and comprehensive approach aimed at understanding the origins and developments of various parasite groups in order to provide a wider evolutionary picture of parasitism as part of biodiversity This is in contrast to most contributions by parasitologists in the literature that focus on circular lines of evidence such as extrapolating from current host associations or distributions to estimate constraints on the timing of the origin and evolution of various parasite groups This approach is narrow and fails to provide the wider evolutionary picture of parasitism on and as part of biodiversity Volume two focuses on the importance of direct host associations and host responses such as pathologies in the geological record to constrain the role of antagonistic interactions in driving the diversification and extinction of

parasite host relationships and disease To better understand the impact on host populations emphasis is given to arthropods colonial metazoans echinoderms mollusks and vertebrates as hosts In addition novel techniques used to constrain interactions in deep time are discussed ranging from chemical and microscopic investigations of host remains such as blood and coprolites to the statistical inference of lateral transfer of transposons and host parasite coevolutionary dynamics using molecular divergence time estimation
