climate change Previous scholarship has pointed to cognitive factors such as conservative politics anti science attitudes aversion to big government and theology Drawing on qualitative fieldwork The Gospel of Climate Skepticism reveals the extent to which climate skepticism and anti environmentalism have in fact become embedded in the social world of many conservative evangelicals Rejecting the common assumption that evangelicals skepticism is simply a side effect of political or theological conservatism the book further shows that between 2006 and 2015 leaders and pundits associated with the Christian Right widely promoted skepticism as the biblical position on climate change The Gospel of Climate Skepticism offers a compelling portrait of how during a critical period of recent history political and religious interests intersected to prevent evangelicals from offering a unified voice in support of legislative action to address climate change The Fast John Oakes,2025-01-18 Fasting has become increasingly popular for a variety of reasons from weight loss to detoxing to the faithful who fast in prayer to seekers pursuing mindfulness to activists using hunger strikes as protest Based on extensive historical scientific and cultural research and reporting The Fast illuminates the numerous facets of this act of self deprivation It looks at the complex science behind the jaw dropping biological changes that occur inside the body when we fast Metabolic switching can prompt repair and renewal down to the molecular level providing benefits for those suffering from obesity and diabetes cancer epilepsy cardiovascular disease neurodegenerative disorders and more Beyond the physical experience fasting can be a great collective unifier and it has been adopted by religions and political movements all over the world Fasting is central to holy seasons and days such as Lent Christianity Ramadan Islam Uposatha Buddhism and Ekadashi Hinduism John Oakes interviews doctors spiritual leaders activists and others who guide him through this practice and embarks on fasts of his own to deliver a book that supplies anyone curious about fasting with profound new understanding appreciation and inspiration *Selected Water Resources Abstracts* ,1986 *The Bet* Paul Sabin,2013-09-03 The Bet uses a legendary wager between the Stanford biologist Paul Ehrlich and the conservative University of Illinois economist Julian Simon to examine the roots of modern environmentalism and its relationship to broader political conflicts in the nation Ehrlich author of the landmark 1968 book The Population Bomb believed that rising populations would cause overconsumption scarcity and disastrous famines Simon countered that flexible markets technological change and human ingenuity would allow societies to adapt to changing circumstances and continue to improve human welfare In 1980 they made a much ballyhooed bet about the future prices of five metals that served as a proxy for their arguments about the future The Bet weaves intellectual biographies of Ehrlich and Simon into the history of late twentieth century environmental politics and other struggles of the era between liberals and conservatives Humanity s larger gamble on the future still remains unresolved By wrestling with the different sides of these arguments The Bet encourages a more nuanced approach to environmental problems one that acknowledges the limitations of both ecology and economics in guiding policy and that instead emphasizes the conflicting values that underlie political choices The Bet is structured around three bets first the

1000 bet that Ehrlich and two colleagues made with Simon over the prices of chromium copper nickel tin and tungsten
second the bet that the United States faced in the 1980 presidential election in choosing between Carter and Reagan and
third the larger gamble that we as a society continue to make as we make choices Scientific and Technical Aerospace
