Chapter 7 Energy Momentum and Energy

Show your work and include units!

$t = 0 \text{ s}$
momentum = $0 \text{ kg}(\text{m/s})$

$t = 1 \text{ s}$
momentum = $100 \text{ kg}(\text{m/s})$

$t = 2 \text{ s}$
momentum = $200 \text{ kg}(\text{m/s})$

$t = 3 \text{ s}$
momentum = $200 \text{ kg}(\text{m/s})$

$t = 5 \text{ s}$
momentum = $0 \text{ kg}(\text{m/s})$

Bronco Brown wants to put $Ft = \Delta mv$ to the test and try bungee jumping. Bronco leaps from a high cliff and experiences 3 s of free fall. Then the bungee cord begins to stretch, reducing his speed to zero in 2 s. Fortunately, the cord stretches to its maximum length just short of the ground below.

Fill in the blanks:

Bronco's mass is 100 kg.

Acceleration of free fall is 10 m/s^2 .

Express values in SI units (distance in m, velocity in m/s , momentum in $\text{kg} \cdot \text{m/s}$, impulse in $\text{N} \cdot \text{s}$, and deceleration in m/s^2).

$d = 1/2 at^2$

The 3-s free-fall distance of Bronco just before the bungee cord begins to stretch = 15 m

Δmv during the 0 to 3-s interval of free fall =

Δmv during the 3 to 5-s of slowing down =

Impulse during the 3 to 5-s of slowing down =

Average force exerted by the cord during the 3 to 5-s interval of slowing down =

How about work and energy? How much KE does Bronco have 3 s after he first jumps?

11,250 J

How much does gravitational PE decrease during this 3 s?

-15,000 J

$1/2(100 \text{ kg})(15 \text{ m/s}^2)$
 $50 \text{ kg}(255 \text{ m/s}^2)$

What two kinds of PE are changing during the 3 to 5-s slowing-down interval?

Gravitational Potential Energy

Haken, Hans Christoph Wolf, 2000 The Physics of Atoms and Quanta is a thorough introduction to experiments and theory in this field Every classical and modern aspect is covered and discussed in detail The sixth edition includes new developments as well as new experiments in quantum entanglement Schrodinger's cat the quantum computer quantum information the atom laser and much more A wealth of

experiments and problems are included As this reference ends with the fundamentals of classical bonding it leads into the authors more advanced book Molecular Physics and Elements of Quantum Chemistry Physics, Volume 1 John D. Cutnell, Kenneth W. Johnson, David Young, Shane Stadler, 2019-07-30 A book to help students understand physics concepts and the role the science plays in their lives This text has been written to engage students in the subject of physics and promote their understanding of key concepts The loose leaf volume of Physics 11th Edition Volume 1 is designed to support student success It opens by discussing kinematics forces dynamics and work and energy It also provides students with the concepts related to impulse and momentum as well as rotational kinematic and dynamics An exploration of principles laws and theories in the text includes Newton's laws of motion the ideal gas law and kinetic theory and the principle of linear superposition and interference phenomena Students also learn about electric forces fields circuits and potential energy The concept of light is explored in relation to reflection refraction and the wave nature of light The text's final chapters look at the nature of the atom nuclear physics and nuclear energy Each chapter of the book comes with a concept summary to reinforce what has been presented Students also expand learning through solving problems team problems and concept calculations problems Physics John D. Cutnell, Kenneth W. Johnson, 2009-09-08 Designed for medical professionals who may struggle with making the leap to conceptual understanding and applying physics the eighth edition continues to build transferable problem solving skills It includes a set of features such as Analyzing Multiple Concept Problems Check Your Understanding Concepts Calculations and Concepts at a Glance This helps the reader to first identify the physics concepts then associate the appropriate mathematical equations and finally to work out an algebraic solution *Learning Management System Technologies and Software Solutions for Online Teaching: Tools and Applications* Kats, Yefim, 2010-05-31 This book gives a general coverage of learning management systems followed by a comparative analysis of the particular LMS products review of technologies supporting different aspects of educational process and the best practices and methodologies for LMS supported course delivery Provided by publisher *Introductory Physics for the Life Sciences: (Volume 2)* David V. Guerra, 2023-06-06 This textbook provides an accessible introduction to physics for undergraduate students in the life sciences including those majoring in all branches of biology biochemistry and psychology and students working on pre professional programs such as pre medical pre dental and physical therapy The text is geared for the algebra based physics course often named College Physics in the United States The order of topics studied in this volume requires students to first understand a concept such as the conservation of energy momentum voltage or current the change in a quantity such as entropy or the rules of ray and wave optics Then students apply these concepts to solve problems in the areas of thermodynamics electrical circuit optics and atomic and nuclear physics Throughout the text these quantity based applications are used to understand systems that are critical to the understanding of biological systems such as the entropy of evolution the signal down the axon of a nerve cell the optics of the eye and the operation of a laser This is part 2 of a two

volume set volume 1 introduced students to the methods of mechanics and applied these problem solving techniques to explicitly biological topics such as the sedimentation rate of red blood cells in haemoglobin the torques and forces on a bacterium employing a flagellum to propel itself through a viscous fluid and the terminal velocity of a protein moving in a gel electrophoresis device Key features Organized and centered around analysis techniques not traditional mechanics and E M Presents a unified approach in a different order meaning that the same laboratories equipment and demonstrations can be used when teaching the course Demonstrates to students that the analysis and concepts they are learning are critical to the understanding of biological systems **ENC Focus** ,1999 **Innovative Curriculum Materials** ,1999 The Laws Of Observation George Jaroszkiewicz,2023-06-07 Science is at a cross roads For several decades the Standard Model of particle physics has managed to fit vast amounts of particle scattering data remarkably well but many questions remain During those decades some sophisticated theoretical hypotheses such as string theory quantum gravity and quantum cosmology have been proposed and studied intensively in an effort to break the log jam of the Standard Model None of those hypotheses have succeeded to date Of greater concern is the increasing tendency by some practitioners in those fields to downplay the empirical principles of science In response this book is a restatement of those principles covering numerous aspects of observation A particular focus is on contextuality versus realism the two fundamentally contrasting ideologies that underpin modern physics **Higher Education Learning Methodologies and Technologies Online** Gabriella Casalino,Marta Cimitile,Pietro Ducange,Natalia Padilla Zea,Riccardo Pecori,Pietro Picerno,Paolo Raviolo,2022-03-05 This book constitutes the thoroughly refereed post conference proceedings of the Third International Workshop on Higher Education Learning Methodologies and Technologies Online HELMeTO 2021 held in Pisa Italy in September 2021 Due to the COVID 19 pandemic the conference was held online The 26 revised full papers and 3 short papers presented were carefully reviewed and selected from a total of 65 submissions The papers present recent research on challenges of implementing emerging technology solution for online online learning pedagogical frameworks facing COVID19 emergency in higher education teaching and learning online learning technologies in practice online learning strategies and resources etc *Mass and Motion in General Relativity* Luc Blanchet,Alessandro Spallicci,Bernard Whiting,2011-01-19 From the infinitesimal scale of particle physics to the cosmic scale of the universe research is concerned with the nature of mass While there have been spectacular advances in physics during the past century mass still remains a mysterious entity at the forefront of current research Our current perspective on gravitation has arisen over millennia through the contemplation of falling apples lift thought experiments and notions of stars spiraling into black holes In this volume the world s leading scientists offer a multifaceted approach to mass by giving a concise and introductory presentation based on insights from their respective fields of research on gravity The main theme is mass and its motion within general relativity and other theories of gravity particularly for compact bodies Within this framework all articles are tied together coherently covering post Newtonian and related methods as well as the

self force approach to the analysis of motion in curved space time closing with an overview of the historical development and a snapshot on the actual state of the art All contributions reflect the fundamental role of mass in physics from issues related to Newton's laws to the effect of self force and radiation reaction within theories of gravitation to the role of the Higgs boson in modern physics High precision measurements are described in detail modified theories of gravity reproducing experimental data are investigated as alternatives to dark matter and the fundamental problem of reconciling any theory of gravity with the physics of quantum fields is addressed Auxiliary chapters set the framework for theoretical contributions within the broader context of experimental physics The book is based upon the lectures of the CNRS School on Mass held in Orlans France in June 2008 All contributions have been anonymously refereed and with the cooperation of the authors revised by the editors to ensure overall consistency Applied Laser Medicine H. Breuer, N. Krasner, T. Okunata, D. Sliney, 2012-12-06 The history of laser applications in medicine starts already In the early 1990s a concerted action program most with the invention of the laser itself sponsored by the European Commission was carried out in Europe for the dissemination of the safe use of It was only a few months after Maiman's invention lasers in medicine and in 1996 a similar program was when this new high intensity light source was used for medical applications Light as a therapeutic tool developed with Russia It was this German Russian had long been used in medicine especially in ophthalmology and dermatology Therefore these disciplines original loose leaf handbook The editors' real plan was the first to take advantage of this new tool increased an ever growing demand for an English version of this handbook too Therefore the editors are very grateful to the Springer publishing house for support Although the early results were not as promising as expected a new field for medical diagnosis and treatment had been defined Most of the difficulties in the English edition of the German original
