

- You are measuring the changes in energy- total, kinetic, and potential over time. To do this, we need to define our system. This is a skater-earth system.
- We also need to establish numbers for mass and speed.

- Place the 10-kg skater at 6-m and start the timer when you hit play. Pause both timer and sim when the skater is at 4-m, 2-m, 0-m, and 6-m. Record the height, speed, and time in the table below. Continue recording until you've reached 45-s.

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation.

Juvenile Justice John T. Whitehead, Steven P. Lab, 2012. *Juvenile Justice* An Introduction is a student friendly analysis of all aspects of the juvenile justice system. The book covers the history and development of the juvenile justice system and the unique issues related to juveniles including police interaction, court processes, due process, movements toward diversion and deinstitutionalization, and community intervention. This book also examines particular issues within juvenile justice such as female delinquency, gang delinquency, and the use of the death penalty and Life Without Parole with juveniles. Evidence based suggestions for successful interventions and treatment are included with a focus on performing cost benefit analyses of what works versus what is ineffective with juveniles. The book concludes with a look to the future of the juvenile court including the real possibility of abolition.
