American Creationism, Creation Science, and Intelligent Design in the Evangelical Market Benjamin L. Huskinson, 2020-08-19 In this compelling and thoroughly researched book Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists His work on the Intelligent Design movement is superb and he prompts me to rethink my long held conviction that Intelligent Design is merely the most recent evolutionary form of creationism This is a very fine book Randall Balmer Author of *Evangelicalism in America* and writer host of *In the Beginning The Creationist Controversy* Benjamin Huskinson s study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate He shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler Author of *Monkey Trials and Gorilla Sermons Evolution and Christianity from Darwin to Intelligent Design* A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate A must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA This book explores the cultural history of anti evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America Separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an off shoot of the creation science movement It demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations

The God of Monkey Science Janet Kellogg Ray, 2023-10-10 How to hold true to your faith and embrace modern science Ever since the Scopes Monkey Trial in the early twentieth century American evangelicals have considered scientists public enemy 1 But this antipathy to modern science turned deadly during the COVID 19 crisis when white evangelicals snubbed precautions and vaccines Herself an evangelical Christian and a science educator Janet Kellogg Ray explains how we got here and how to fix it As the follow up to *Baby Dinosaurs on the Ark* this lively volume covers evolution as well as the coronavirus pandemic vaccines climate change and the frontiers of genetic research Ray explains the facts accessibly and with verve Along the way she vividly narrates the scientific achievements and political and religious drama that got us to where we are today Ultimately Ray calls for evangelicals to speak to science rather than deny it We need Christian ethics now more than ever to determine how best to act in light of current scientific data and for love of

interpreted The Heresy of Ham is a tremendous resource for anyone struggling coming to grips with these issues

Science V. Story Emma Frances Bloomfield,2024-02-27 Uncovering common threads across types of science skepticism to show why these controversial narratives stick and how we can more effectively counter them through storytelling Science v Story analyzes four scientific controversies climate change evolution vaccination and COVID 19 through the lens of storytelling Instead of viewing stories as adversaries to scientific practices Emma Frances Bloomfield demonstrates how storytelling is integral to science communication Drawing from narrative theory and rhetorical studies Science v Story examines scientific stories and rival stories including disingenuous rival stories that undermine scientific conclusions and productive rival stories that work to make science more inclusive Science v Story offers two tools to evaluate and build stories narrative webs and narrative constellations These visual mapping tools chart the features of a story i e characters action sequence scope storyteller and content to locate opportunities for audience engagement Bloomfield ultimately argues that we can strengthen science communication by incorporating storytelling in critical ways that are attentive to audience and context

The Conflict of the Ages Teacher Edition I-III Michael J. Findley,Mary C. Findley , science history homeschool evolution young earth creation ancient manuscripts **A Christian Student'S Guide to Truth in Science** Stanley J. O'Briant,2015-03-13 This book exposes the attempt to teach atheistic evolution to students often ridiculing their faith in God The classrooms in our schools have become the battlegrounds for the minds of our children Since the introduction of evolution by Charles Darwin there has been a growing list of atheist professors who vigorously fight any religion The classrooms of America should not be the battlegrounds of any religion but evolution is a religion It has no place

in the classroom since it does not offer any information that improves the teaching of any science class except evolution itself. There is no proof of evolution, only assertions, innuendos, credulity, belief without proof, and suppositions. Fully one third of all geology textbooks deal with evolution, which is founded only on opinion and undocumented assertions. Therefore, it should be removed from all textbooks. Dr. David Menton, who taught medicine at the Washington School of Medicine in St. Louis, Missouri, for twenty-five years, stated that he never once needed to reference evolution in any medical class. A coalition of organizations, such as the National Academy of Sciences (whose members are 93% atheist or agnostic) and the National Center for Science and Education, control most of the government grants intended for schools, use them fully to support the atheism of evolution, and they attack any criticism of evolution.
