The Burning Answer Keith Barnham,2014-05-15 Our civilisation stands on the brink of catastrophe Our thirst for energy has led to threats from global warming nuclear disaster and conflict in oil rich countries We are running out of options Solar power Keith Barnham argues is the answer In this eye opening book he shows how a solar revolution is developing based on one of Einstein s lesser known discoveries one that gave us laptop computers and mobile phones An accessible guide to renewable technology and a hard hitting critique of the arguments of solar sceptics The Burning Answer outlines a future in which the fuel for electric cars will be generated on our rooftops It is above all an impassioned call to arms to join the solar revolution before it s too late **Synthesis of Adequate Mathematical Descriptions of Physical Processes** Yurii

Menshykov,2020-08-11 For effective use of the results of computational calculations it is necessary that the computational schemes used correspond to real physical processes so that the schemes are adequate The issue of adequacy is currently poorly understood and there are also no generally accepted criteria of adequacy This book is the first to address the questions of constructing adequate mathematical descriptions of physical processes and their reasonable use in the future for various purposes It proposes two adequacy criteria quantitative and qualitative and describes several possible algorithms for synthesis of cases when the physical process is composed of a system of ordinary differential equations or a mathematical model in algebraic form The algorithms described here will be useful for specialists in areas where methods of mathematical modeling are used such as mechanics *The Surface Wettability Effect on Phase Change* Marco Marengo,Joel De

Coninck,2021-10-30 The Surface Wettability Effect on Phase Change collects high level contributions from internationally recognised scientists in the field It thoroughly explores surface wettability with topics spanning from the physics of phase change physics of nucleation mesoscale modeling analysis of phenomena such drop evaporation boiling local heat flux at triple line Leidenfrost dropwise condensation heat transfer enhancement freezing icing All the topics are treated by discussing experimental results mathematical modeling and numerical simulations In particular the numerical methods look at direct numerical simulations in the framework of VOF simulations phase field simulations and molecular dynamics An introduction to equilibrium and non equilibrium thermodynamics of phase change wetting phenomena liquid interfaces numerical simulation of wetting phenomena and phase change is offered for readers who are less familiar in the field This book will be of interest to researchers academics engineers and postgraduate students working in the area of thermofluids thermal management and surface technology It Keeps Me Seeking Andrew Briggs,Hans Halvorson,Andrew M.

unification to be developed based on current theories of quantum gravity including string theory In addition I support the views of some scientists and philosophers that currently too much resources are being consumed on the idea of developing quantum gravity theories and in particular string theory to include general relativity and to unify gravity with other forces as long as science does not impose such research programs

What levels of explanation in the behavioural sciences? Giuseppe Boccignone, Roberto Cordeschi, 2015-07-03 Complex systems are to be seen as typically having multiple levels of organization For instance in the behavioural and cognitive sciences there has been a long lasting trend promoted by the seminal work of David Marr putting focus on three distinct levels of analysis the computational level accounting for the What and Why issues the algorithmic and the implementational levels specifying the How problem However the tremendous developments in neuroscience knowledge about processes at different scales of organization together with the complexity of today cognitive theories suggest that there will hardly be only three levels of explanation Instead there will be many different degrees of commitments corresponding to the different granularities from high level behavioural models to low level neural and molecular models of the cognitive research program For instance Bayesian approaches that are usually advocated for formalizing Marr's computational level and rational behaviour have even been adopted to model synaptic plasticity and axon guidance by molecular gradients As a result we can consider the behavioural scientist as dealing with models at a multiplicity of levels The purpose of this Research Topic in Frontiers in Theoretical and Philosophical Psychology is to promote an approach to the role of the levels and explanation and models which is of interest for cognitive scientists neuroscientists psychologists behavioural scientists and philosophers of science
