H. G. J. Moseley J. L. Heilbron, 2024-03-29 H. G. J. Moseley 1887-1915 the son and grandson of distinguished English scientists a favorite student of Rutherford's and a colleague of Bohr's completed researches of capital importance for atomic physics just before the outbreak of World War I. He was urged to devote himself to scientific war work in England but his duty as he saw it was to join the battle. He procured himself command of a signaling section in the Royal Engineers a speedy trip to Gallipoli and death in the bloody battle for Sari Bair. In this work the author presents a full record of Moseley's brief and brilliant career. It gives instructive detail about Eton which as Heilbron shows offered more opportunity for acquiring a foundation in science than its emphasis on Greek and games would suggest about Oxford a scientific backwater in Moseley's time and about Rutherford's thriving laboratory at the University of Manchester. It describes in detail Moseley's apprenticeship in experimental physics his growth under the tight supervision of Manchester and his classical independent work on X-rays which almost certainly would have brought him the Nobel Prize. An epilogue sketches the chief results secured by others in the decade after his death in the research lines he opened. Heilbron's account is informed by an unequalled acquaintance with the relevant manuscript material including all of Moseley's known correspondence most of which he discovered and the paper of colleagues such as Bohr, W. H. Bragg, G. H. Darwin, F. A. Lindemann, Lord Cherwell, Rutherford, Henry Tizard, Georges Ubrin and G. von Hevesy. An important feature of the book is the publication in extenso of Moseley's surviving correspondence. These letters are not only a rich source for historians of science and of education they are also splendid reading well written records of the maturing of a strong mind pithy commentaries on the Establishment as Moseley saw it and exciting notices of the course of one of the most important researches in modern physical science.
