Capital goods and durable goods industries therefore suffer large output declines during recessions. In contrast, consumers cannot postpone buying nondurables such as food; therefore, recessions only slightly reduce nondurable output. Also, capital goods and durable goods expenditures tend to be "lumpy." Usually, a large expenditure is needed to purchase them, and this shrinks to zero after the purchase is made.

2. a. Measuring the unemployment rate means first determining who is eligible and available to work. The total S.A. population is divided into three groups. One group is made up of people under 15 years of age and people who are institutionalized. The
