Scaled for Success Philip Hayward, 2018-07-26 Emerging from the confluence of Greco-Roman mythology and regional folklore, the mermaid has been an enduring motif in Western culture since the medieval period. It has also been disseminated more widely initially through Western trade and colonisation and more recently through the increasing globalisation of media products and outlets. Scaled for Success offers the first detailed overview of the mermaids dispersal outside Europe. Complementing previous studies of the interrelationship between the mermaid and Mami Wata spirit in West Africa, this volume addresses the mermaids presence in a range of Middle Eastern, Asian, Australian, Latin American and North American contexts. Individual chapters identify the manner in which the mermaid has been variously syncretised and/or resignified in contexts as diverse as Indian public statuary, Thai cinema and Coney Islands annual Mermaid Parade. Rather than lingering as

a relic of a bygone age the mermaid emerges as a versatile dynamic and above all polyvalent figure Her prominence exemplifies the manner in which contemporary media lore has extended the currency of established folkloric figures in new and often surprising ways Analysing aspects of religious symbolism visual art literature and contemporary popular culture this copiously illustrated volume profiles an intriguing and highly diverse phenomenon Philip Hayward is editor of the journal *Shima* and holds adjunct professor positions at the University of Technology Sydney and at Southern Cross University His previous volume *Making a Splash Mermaids and Mermen in 20th and 21st Century Audiovisual Media* was published by John Libbey Publishing Indiana University Press in 2017

China, Trust and Digital Supply Chains Warwick Powell, 2022-09-01

China Trust and Digital Supply Chains presents a critical reflection on blockchain technologies in the context of their adoption in China and the world that China is engaged in and shaping Approaching the issues of blockchain technology adoption and development on China's own terms is critical if policy makers and others are to make effective sense of one of the key dynamics shaping the next few decades of the global landscape The work challenges the trust trope that dominates much discussion of blockchain technology's application It argues contrary to the predominant trust trope that blockchain is not about trust at all It shows that China's reimagining of the 21st century global order is premised on driving intensified cross border economic interactions without the presupposition of trust and blockchain technology makes that possible It also explores the paradox of technological decentralisation being taken up with vigour by a centralist polity the role of blockchain technology as a critical condition of existence for the successful globalisation of China's digital currency initiative and the need to devise governance institutions that are multilateral in nature to reflect the multi polar nature of decentralised information systems with domestic and cross border permutations This book is of significant interest to readers of political economy public policy blockchain technology and Chinese studies
