

## CHAPTER 15: MACRO-ECONOMIC OBJECTIVES

1. a. The four phases of a typical business cycle, starting at the bottom, are trough, recovery, peak, and recession.

b. As seen in the table below, the length of a complete cycle varies from about 1 to 3 years to as long as 15 years.

### U.S. Recessions since 1950

| Period                         | Duration (Months) |  |

c. There is a pre-Christmas spurt in production and sales and a January slackening. This normal seasonal variation does not signal boom or recession. From decade to decade, the long-term trend (the secular trend) of the S.A. economy has been upward. A period with no GDP growth thus does not mean all is normal, but that the economy is operating below its trend growth of output.

d. Because capital goods and durable goods last, purchases can be postponed. This may happen when a recession is forecast. Capital goods and durable goods industries therefore suffer large output declines during recessions. In contrast, consumers cannot postpone buying nondurables such as food; therefore, recessions only slightly reduce nondurable output. Also, capital goods and durable goods expenditures tend to be "lumpy." Usually, a large expenditure is needed to purchase them, and this shrinks to zero after the purchase is made.

2. a. Measuring the unemployment rate means first determining who is eligible and available to work. The total S.A. population is divided into three groups. One group is made up of people under 15 years of age and people who are institutionalized. The

Economics, 13e BEGG AND VERNAS, 2025-03-28 Economics 13e      **Ebook: Managerial Accounting - Global Edition**

Ronald Hilton, David Platt, 2014-09-16 We are pleased to present this Global Edition which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity based costing, target costing, the value chain, customer profitability analysis and throughput costing, while also including traditional topics such as job order costing, budgeting and performance evaluation. Many of the real world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.      **EBOOK: Applied Calculus for Business, Economics and the Social and Life Sciences, Expanded Edition**
