(Chapter – 1) (Variations in Psychological Attributes) (Important Questions)

(Class – XII)

Question 8:

Why is contextual intelligence important?

Answer 8:

Contextual intelligence, often known as practical intelligence, is the capacity to respond to the environmental pressures we face every day.

Question 9:

What is aptitude?

Answer 9:

The ability of a person to pick up new skills or knowledge following training is determined by a variety of traits.

Question 10:

What is evaluation?

Answer 10:

Assessment is the measuring of a person's psychological characteristics and their appraisal, frequently in the context of a set of benchmarks for comparison.

Question 11:

_____ behaviour describes a person's capacity for independence and adept environment management.

Answer 11:

Adaptive behaviour describes a person's ability to function independently and successfully navigate their surroundings.

Question 12:

What is an exceptional general talent that is demonstrated in superior performance across a range of domains?

Answer 12:

Remarkable general talents who perform well in various fields are known as gifted.

Question 13:

What is the definition of gifted?

Answer 13:

Gifted Traits:

- Strong reasoning, questioning, and problem-solving skills
- Rapid information processing
- Excellent generalization and discrimination skills
- Highly original and creative thinking
- Highly original and creative thinking.

AS Psychology Unit 1: Cognitive Psychology, Developmental Psychology, Research Methods Nicholas Alexandros Savva, 2014-10-28 The exam books have been carefully written using student friendly language and a layout you will find easy to understand Each topic has been broke down into EXAM NOTES which are more concise than general psychology text books but more comprehensive than standard revision guides These books have been specially developed and written by experienced teachers and examiners to help students achieve the best possible grade in their psychology exam Reduce frustration All exam notes are presented in an easy way for you to learn Prevent nail biting No more I don t get this Key theories and

studies are written in an easy peasy friendly way Prevent Hair loss Don t pull your hair out over the evaluation part We have written it all for you Reduce panic attacks We have given you lots of exam questions at the end of the exam notes to practise to prevent shock in the real exam if you haven t seen any before Prevent confusion Use the revision checklist as you study to tell you what and how much you need to know Visit www.psychologyzone.co.uk the only dedicated A Level Psychology website which has over 1000 exam questions and model answers exam notes exam advice and much more Register onto the website and use the examGenerator tool You can search for exam style questions with model answers or mark schemes and create your own revision or mock paper

The Swami Ashish,2015-06-19 Try gauging the stability of a man who does not remember certain period from his past What if this memory loss is due to an accident What if the accident was caused due to his own mistakes Sure he frantically remains disturbed As an adult he wishes to fight for his answers When grown up he wants to grope for the answers When wise he intends understanding the answers Now his intent is on the beyond Let his fellow men not suffer like him What happens if a society is subjected to similar phenomena What happens if a nation suffers from such past India represents the longest continuing civilization in the world India represents the eastern thought the eastern mind India has been subjected to abovementioned accidents Swami Sad Chidananda lived to see them through Many joined him driven to look for the answers to these perennial questions Genuine questions only de questioned them Now the answers were not needed The questions were not there anymore Collectively they learnt that this was the universal human story They experienced the development of the classical eastern mind and learnt that the classical western mind evolved too only to embrace each other

Linguistic Influences on Mathematical Cognition Ann Dowker,Hans-Christoph Nuerk,2017-06-16 For many years an abstract amodal semantic magnitude representation largely independent of verbal linguistic representations has been viewed as the core numerical or mathematical representation This assumption has been substantially challenged in recent years Linguistic properties affect not only verbal representations of numbers but also numerical magnitude representation spatial magnitude representations calculation parity representation place value representation and even early number acquisition Thus we postulate that numerical and arithmetic processing are not fully independent of linguistic processing This is not to say that in patients magnitude processing cannot function independently of linguistic processing we just suppose these functions are connected in the functioning brain So far much research about linguistic influences on numerical cognition has simply demonstrated that language influences number without investigating the level at which a particular language influence operates After an overview we present new findings on language influences on seven language levels Conceptual Conceptual properties of language Syntactic The grammatical structure of languages beyond the word level influences Semantic The semantic meaning or existence of words Lexical The lexical composition of words in particular number words Visuo spatial orthographic Orthographic properties such as the writing reading direction of a language Phonological Phonological phonetic properties of languages Other language related skills Verbal working

memory and other cognitive skills related to language representations We hope that this book provides a new and structured overview on the exciting influences of linguistic processing on numerical cognition at almost all levels of language processing
