Artificial Intelligence in Education Cristina Conati,Neil Heffernan,Antonija Mitrovic,M. Felisa Verdejo,2015-06-16 This book constitutes the refereed proceedings of the 17th International Conference on Artificial Intelligence in Education AIED 2015 held in Madrid Spain in June 2015 The 50 revised full papers presented together with 3

keynotes 79 poster presentations 13 doctoral consortium papers 16 workshop abstracts and 8 interactive event papers were carefully reviewed and selected from numerous submissions The conference provides opportunities for the cross fertilization of approaches techniques and ideas from the many fields that comprise AIED including computer science cognitive and learning sciences education game design psychology sociology linguistics as well as many domain specific areas

Community College Mathematics Brian Cafarella,2022-06-29 This book explores the rich history of community college math with a specific focus on gatekeeper math classes Gatekeeper math classes include courses such as college algebra introduction to statistics and all developmental math classes For community colleges successful completion of these classes is imperative for student retention This book presents a decade by decade analysis of the history of community college mathematics The author employs a mix of conceptual empirical and quantitative research The empirical research stems from interviews with 30 community college faculty members from seven community colleges From the 1970s to the pandemic in the early 2020s the book explores math curricula as well as trends initiatives teaching practices and mandates that have impacted community college math The positives and negatives of such trends initiatives and mandates are presented along with suggestions on how to apply such knowledge going forward The author addresses the key questions How can we build a future model for community college gatekeeper math classes that is both successful and sustainable Additionally how can we learn from the past and the present to build such a model This book will be ideal for students in graduate programs focusing on community college leadership or developmental education leadership as well as all those hoping to improve success rates in community college mathematics programs

The Software Encyclopedia ,1988 **Computer Aided Assessment of Mathematics** Chris Sangwin,2013-05-02 Computer aided assessment is rapidly becoming widely used in mathematics education from open access learning materials to interactive materials and online assessments This book provides a survey of the field theoretical background and practical examples It is aimed at any teachers interested in using or developing their own online assessments

Intermediate Algebra Mark Dugopolski,2005 Intermediate Algebra is designed to provide your students with the algebra background needed for further college level mathematics courses The unifying theme of this text is the development of the skills necessary for solving equations and inequalities followed by the application of those skills to solving applied problems The primary goal in writing the third edition of Intermediate Algebra has been to retain the features that made the second edition so successful while incorporating the comments and suggestions of second edition users Many new features have been provided that will help instructors reach the goals that they have set for their students As always the author endeavors to write texts that students can read understand and enjoy while gaining confidence in their ability to use mathematics

Formal Concept Analysis Karell Bertet,Daniel Borchmann,Peggy Cellier,Sébastien Ferré,2017-06-02 This book constitutes the proceedings of the 14th International Conference on Formal Concept Analysis ICFCA 2017 held in Rennes France in June 2017 The 13 full papers presented in this volume were carefully reviewed and selected from 37

submissions The book also contains an invited contribution and a historical paper translated from German and originally published in *Die Klassifikation und ihr Umfeld* edited by P O Degens H J Hermes and O Opitz Indeks Verlag Frankfurt 1986

The field of Formal Concept Analysis FCA originated in the 1980s in Darmstadt as a subfield of mathematical order theory with prior developments in other research groups Its original motivation was to consider complete lattices as lattices of concepts drawing motivation from philosophy and mathematics alike FCA has since then developed into a wide research area with applications much beyond its original motivation for example in logic data mining learning and psychology

Artificial Intelligence based Solutions for Industrial Applications Pooja Jha, Shalini Mahato, Prasanta K. Jana, Sudhanshu Maurya, Ines Chihi, 2024-11-20

Artificial Intelligence based Solutions for Industrial Applications aims to examine the utilization of artificial intelligence AI technologies to tackle difficult industrial issues and offers readers a thorough understanding of how these technologies are being employed to address intricate industrial challenges and to stimulate innovation This book explores the fundamental principles of artificial intelligence AI and its practical use in industrial environments This book improves understanding of core concepts the present state of the art and real time implementation of AI in many industrial applications This book describes the detailed implementation of AI in the industrial sector as well as related case studies for in depth understanding Basic concepts related work reviews illustrations empirical results and tables are integrated within each chapter to give the readers the opportunity to gain maximum knowledge and to easily understand the methodology and results presented This book introduces a variety of smart algorithms to help in filtering important information and to solve problems in the application domains Application of machine learning and deep learning in the industry demonstrates the capabilities by which it may be used to solve practical problems in the Fourth Industrial Revolution and it equips readers with the necessary knowledge and tools to design solutions by themselves with the help of theory and practical examples dealt with The fourth industrial revolution and its consequences on society and organizations are discussed in this book

Features Detailed understanding of the industrial application of AI Discussion of core concepts of different machine learning and deep learning techniques such as artificial neural networks support vector machines K nearest neighbour decision tree logistic regression and many more Detailed study on various industrial applications of machine learning and deep learning in healthcare education entertainment share market manufacturing and many more Case studies on industrial application of AI Summation of the fourth industrial revolution and its consequences on society and organizations This book is primarily written for graduate students engineers and academic researchers industrial practitioners and anyone who wants to optimize production processes explore AI technology or stay ahead in the industrial field It covers the complexities of AI in industrial contexts from core basic understanding to complex implementation

Human Forces in Engineering Andrej Atrens, Aleks David Atrens, 2018-04-09 This book aims to provide engineers with an overview knowledge of disciplines such as sociopolitics psychology economics and leadership Engineers are disproportionately represented in senior management and in leadership

roles and many work outside typical engineering roles Vital to their success are technical skills but also crucially an understanding of the societal setting within which engineering takes place Engineers that leverage their technical and analytical abilities with an understanding of the social context are enormously successful both professionally and in terms of broader impact This book originated from a recognition that this capacity of engineers can be enhanced with an understanding of the human forces the phenomena that underpin and govern human interactions The key ideas were assembled with domain experts from each field to provide the key critical insights and how these might be practically applied by engineers The authors provide the basis for the learning necessary to guide high level strategic decisions manage teams of diverse skillsets in complex environments communicate in the context of management and decision making and to excel at the interface between a technical discipline and non scientific fields Prof Andrej Atrens is Professor of Materials Engineering at The University of Queensland UQ He has experience in Universities and Research Institutes in Switzerland Thailand Canada France Germany Sweden China USA Fiji and Australia Dr Aleks Atrens is an Honorary Research Fellow at The University of Queensland UQ He earned his BE Hons in Chemical Engineering in 2007 and his PhD in 2011 both at UQ where he has subsequently been a lecturer and researcher

Knowledge Spaces Jean-Claude Falmagne, Dietrich Albert, Christopher Doble, David Eppstein, Xiangen Hu, 2013-06-20 The book describes up to date applications and relevant theoretical results These applications come from various places but the most important one numerically speaking is the internet based educational system ALEKS The ALEKS system is bilingual English Spanish and covers all of mathematics from third grade to the end of high school and chemistry It is also widely used in higher education because US students are often poorly prepared when they reach the university level The chapter by Taagepera and Arasasingham deals with the application of knowledge spaces independent of ALEKS to the teaching of college chemistry The four chapters by Albert and his collaborators strive to give cognitive interpretations to the combinatoric structures obtained and used by the ALEKS system The contribution by Eppstein is technical and develops means of searching the knowledge structure efficiently
