Cybersecurity in the Age of Artificial Intelligence Pasi Koistinen,2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity it has kicked it open set up shop inside and begun rewriting the rules From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react AI has made the threat landscape faster smarter and far less predictable This book is a practical guide to that unsettling reality It doesn t trade in hype or hand waving optimism Instead it lays out in plain language how AI systems create new risks what happens when security practices built for deterministic software fail and why human vigilance and organizational discipline are more important than ever Inside you ll discover How attackers are already using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don t sacrifice accountability for convenience Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn t theoretical it s already operational this book offers a strategic roadmap for navigating a landscape where yesterday s defenses are no longer enough You ll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can t explain their own reasoning Along the way you ll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn t a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you re responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn t whether AI will reshape your security strategy The question is whether you ll be ready when it does

Advances in Teaching and Learning for Cyber Security Education Phil Legg,Natalie Coull,Charles Clarke,2024-12-27 This book showcases latest trends and innovations for how we teach and approach cyber security

education Cyber security underpins the technological advances of the 21st century and is a fundamental requirement in today's society. Therefore, how we teach and educate on topics of cyber security and how we overcome challenges in this space require a collective effort between academia, industry, and government. The variety of works in this book include AI and LLMs for cyber security, digital forensics, and how teaching cases can be generated at scale, events and initiatives to inspire the younger generations to pursue cyber pathways, assessment methods that provoke and develop adversarial cyber security mindsets, and innovative approaches for teaching cyber management concepts. As a rapidly growing area of education, there are many fascinating examples of innovative teaching and assessment taking place; however, as a community, we can do more to share best practice and enhance collaboration across the education sector. CSE Connect is a community group that aims to promote sharing and collaboration in cyber security education so that we can upskill and innovate the community together. The chapters of this book were presented at the 4th Annual Advances in Teaching and Learning for Cyber Security Education conference hosted by CSE Connect at the University of the West of England, Bristol, UK, on July 2, 2024. The book is of interest to educators, students, and practitioners in cyber security, both for those looking to upskill in cyber security education as well as those aspiring to work within the cyber security sector.
