The Oxford Handbook of Comparative Evolutionary Psychology Jennifer Vonk, Todd K. Shackelford, 2012-02-13 This volume brings together leading experts in comparative and evolutionary psychology. Top scholars summarize the histories and possible futures of their disciplines and the contribution of each to illuminating the evolutionary forces that give rise to unique abilities in distantly and closely related species.

Handbook of the Sociology of Emotions: Volume II Jan E. Stets, Jonathan H. Turner, 2014-08-18 Handbook of the Sociology of Emotions Volume II presents all new chapters in the ever developing area of the sociology of emotions. The volume is divided into two sections: Theoretical Perspectives and Social Arenas of Emotions. It reviews major sociological theories on emotions which include evolutionary theory, identity theory, affect control theory, social exchange theory, ritual theory, and cultural theory, among others. Social arenas where emotions are examined include but are not limited to the economy and the workplace, the family, mental health, crime, sports, technology, social movements, and the field of science. All the chapters review the major theories and research in the area, and each chapter ends with some discussion of directions for future research. The Sociology of Emotions is a fast growing and vital field in the broad discipline of Sociology. This volume II follows the Handbook of the Sociology of Emotions which was first published in 2006. In 2008, this first handbook received the Outstanding Recent Contribution in the Emotions Section of the American Sociological Association. With contributions from leading scholars from different areas in the discipline such as neurosociology, culture, economics, mental health, gender, social movements, discussing state of art theory and research on emotions in sociology, this volume will generate wider appeal to the sociological community.

Gene Regulation as a Driver of Adaptation and Speciation Ekaterina Shelest, Katja Nowick, Deborah A. Triant, 2022-01-06

The Politics of Species Raymond Corbey, Annette Lanjouw, 2013-09-05 Experts from a range of disciplines identify the key barriers to a definition of moral respect that includes nonhuman animals.

Cognition, Evolution, and Behavior Sara J. Shettleworth, 2010-04-10 How do animals perceive the world, learn, remember, search for food or mates, communicate, and find their way around? Do any nonhuman animals count, imitate one another, use a language, or have a culture? What are the uses of cognition in nature, and how might it have evolved? What is the current status of Darwin's claim that other species share the same mental powers as humans, but to different degrees? In this completely revised second edition of *Cognition, Evolution, and Behavior*, Sara Shettleworth addresses these questions among others by integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition in the broadest sense, from species-specific adaptations of vision in fish and associative learning in rats to discussions of theory of mind in chimpanzees, dogs, and ravens. She reviews the latest research on topics such as episodic memory, metacognition, and cooperation, and other regarding behavior in animals as well as recent theories about what makes human cognition unique. In

every part of this new edition Shettleworth incorporates findings and theoretical approaches that have emerged since the first edition was published in 1998 The chapters are now organized into three sections Fundamental Mechanisms perception learning categorization memory Physical Cognition space time number physical causation and Social Cognition social knowledge social learning communication Shettleworth has also added new chapters on evolution and the brain and on numerical cognition and a new chapter on physical causation that integrates theories of instrumental behavior with discussions of foraging planning and tool using *Animal Minds & Animal Ethics* Klaus Petrus,Markus Wild,2014-03-15

Animal minds and animal ethics different origins connecting similarities Philosophers working on questions of animal ethics usually draw on research into animal cognition and subscribe to strong positions regarding animal minds Whereas philosophers interested in the question of animal minds sometimes draw ethical conclusions from the positions they argue for In spite of such overlaps these two areas of research have grown up separately One reason for this separation stems from the institutional distinction between theoretical and practical philosophy The principal aim of this anthology is to build bridges between the fields and different philosophical approaches of animal ethics and of animal minds and cognition *Evolution Of Language, The - Proceedings Of The 9th International Conference (Evolang9)* Erica A Cartmill,Thomas C Scott-phillips,Monica Tamariz,James R Hurford,2012-02-29

Proceedings of Evolang IX the 9th International Conference on the Evolution of Language The Evolang conferences are the leading international conferences for new findings in the study of the origins and evolution of language They attract a multidisciplinary audience The proceedings are an important resource for researchers in the field **Handbook on Evolution and Society** Alexandra Maryanski,Richard Machalek,Jonathan H. Turner,2015-11-17

Handbook on Evolution and Society brings together original chapters by prominent scholars who have been instrumental in the revival of evolutionary theorizing and research in the social sciences over the last twenty five years Previously unpublished essays provide up to date critical surveys of recent research and key debates The contributors discuss early challenges posed by sociobiology the rise of evolutionary psychology the more conflicted response of evolutionary sociology to sociobiology and evolutionary psychology Chapters address the application and limitations of Darwinian ideas in the social sciences Prominent authors come from a variety of disciplines in ecology biology primatology psychology sociology and the humanities The most comprehensive resource available this vital collection demonstrates to scholars and students the new ways in which evolutionary approaches ultimately derived from biology are influencing the diverse social sciences and humanities **Apes and Human Evolution** Russell H. Tuttle,2014-02-17

Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes [Just Another Ape?](#) Helene Guldberg,2013-11-12

Today the belief that human beings are special is distinctly out of fashion Almost every day we are

presented with new revelations about how animals are so much more like us than we ever imagined The argument is at its most powerful when it comes to our closest living relatives the great apes This book argues that whatever first impressions might tell us apes are really not just like us Science has provided strong evidence that the boundaries between us and other species are vast Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future in which case we might as well be monkeys

Campaigns and Voters in Developing Democracies Noam Lupu, Virginia Oliveros, Luis Schiumerini, 2019-02-26 Voting behavior is informed by the experience of advanced democracies yet the electoral context in developing democracies is significantly different Civil society is often weak poverty and inequality high political parties ephemeral and attachments to them weak corruption rampant and clientelism widespread Voting decisions in developing democracies follow similar logics to those in advanced democracies in that voters base their choices on group affiliation issue positions valence considerations and campaign persuasion Yet developing democracies differ in the weight citizens assign to these considerations Where few social identity groups are politically salient and partisan attachments are sparse voters may place more weight on issue voting Where issues are largely absent from political discourse valence considerations and campaign effects play a larger role

Campaigns and Voters in Developing Democracies develops a theoretical framework to specify why voter behavior differs across contexts
