
Unit 6 APES Exam Review Questions with correct Answers 100% correct

Compare a nonrenewable to a renewable energy source - answer Nonrenewable resources exist in a fixed amount and cannot be replaced on a human timescale (Examples: coal, oil, natural gas, nuclear). Renewable resources can be replenished naturally at or near the rate of consumption (Examples: solar, biomass, geothermal, wind, hydropower).

Identify three examples of renewable resources and three examples of nonrenewable resources. - answer Non Renewable- coal, oil, natural gas
Renewable- solar, biomass, geothermal

How do developed and developing countries compare when it comes to energy consumption? Why? - answer Developed countries use more energy because they have more resources too and have more things that need energy consumption compared to developing countries who use other resources besides energy

What type of country (developed or developing) uses more fossil fuels? Why? - answer Developing countries use more fossil fuels because they don't have other resources to create energy like developed countries

Does industrialization lead to high energy consumption rates? Why/why not? - answer Yes, because more industries use energy for lighting and working machines which leads to a lot of energy that is produced in industries and factories

Why is wood fuel commonly used in developing countries? - answer Easy accessibility

What are some environmental concerns with using wood as an energy source? - answer Particle emissions that turn into smog

List three air pollutants that are emitted during the burning of coal. - answer Mercury, lead, sulfur dioxide

Place the following 8 events in chronological order: the oil spill of the Exxon Valdez; the meltdown of the reactor at Chernobyl; the discovery of contamination at Love Canal; The first Earth Day; the leak of methyl isocyanate in Bhopal; the drafting of the Kyoto

Shackelford, 2012-02-13 This volume brings together leading experts in comparative and evolutionary psychology Top scholars summarize the histories and possible futures of their disciplines and the contribution of each to illuminating the evolutionary forces that give rise to unique abilities in distantly and closely related species **The Evolution of Childhood** Melvin Konner, 2011-11-30 This book is an intellectual tour de force a comprehensive Darwinian interpretation of human development Looking at the entire range of human evolutionary history Melvin Konner tells the compelling and complex story of how cross cultural and universal characteristics of our growth from infancy to adolescence became rooted in genetically inherited characteristics of the human brain All study of our evolution starts with one simple truth human beings take an extraordinarily long time to grow up What does this extended period of dependency have to do with human brain growth and social interactions And why is play a sign of cognitive complexity and a spur for cultural evolution As Konner explores these questions and topics ranging from bipedal walking to incest taboos he firmly lays the foundations of psychology in biology As his book eloquently explains human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each other In our love of those we learn from we find our way as individuals and as a species Never before has this intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution Bonobos Hare & Yamamoto, 2016 **Cara Mudah UN 09 B.Ing SMP/MTs ,**

Emotions of Animals and Humans Shigeru Watanabe, Stan Kuczaj, 2012-08-31 This book takes a multidisciplinary approach to emotion with contributions from biologists psychologists neuroscientists robot engineers and artists A wide range of emotional phenomena is discussed including the notion that humans sophisticated sensibility as evidenced by our aesthetic appreciation of the arts is based at least in part on a basic emotional sensibility that is found in young children and perhaps even some non human animal species As a result this book comprises a unique comparative perspective on the study of emotion A number of chapters consider emotions in a variety of animal groups including fish birds and mammals Other chapters expand the scope of the book to humans and robots Specific topics covered in these chapters run the gamut from lower level emotional activity such as emotional expression to higher level emotional activity such as altruism love and aesthetics Taken as a whole the book presents manifold perspectives on emotion and provides a solid foundation for future multidisciplinary research on the nature of emotions *Narrative Persuasion. A Cognitive Perspective on Language Evolution* Francesco Ferretti, 2022-08-23 This book explores the evolutionary and cognitive foundations of human communication focusing on narrative as its distinctive dimension Within a framework of continuity with both the

communication of our hominin predecessors and that of non human animals the book is about a twofold proposal It includes the idea that human and animal communication has an intrinsically persuasive nature along with the hypothesis that humans developed narrative forms of communication in order to enhance their persuasive abilities In this view narrative persuasion becomes the feature that distinguishes human communication from animal communication The study of the transition from animal communication to language addresses both the selective pressures that led communication for persuasive purposes to take a narrative form and the cognitive architectures and expressive systems that enabled our ancestors to cope with the selective pressures of persuasive narrative based communication Language evolution is interdisciplinary even from the specific perspective of evolutionary pragmatics chosen here Therefore this book is intended for researchers working in fields such as cognitive sciences philosophy evolutionary biology cognitive psychology and primatology It also represents a valuable resource for advanced students in cognitive sciences linguistics and philosophy
