Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library. Research Libraries,1979 **The Chemistry of Polymers** John W. Nicholson,2006 This established and highly readable introductory text is now in its 3rd edition and is ideal for chemists requiring a broad introduction to the field of polymers

Principles of Polymerization George G. Odian,1991-11 Describes the physical and organic chemistry of the reactions by which polymer molecules are synthesized Begins by introducing the characteristics which distinguish polymers from their much smaller sized homologs Proceeds to a detailed study of three types of polymerization reactions step chain and ring opening Reactions are characterized as to their kinetic and thermodynamic features their scope and utility for synthesis of different types of polymer structures and the process conditions which are used to carry them out Assumes a background in organic and physical chemistry and can serve as either a self teaching guide to polymers for the beginner or as a handy reference for the experienced polymer chemist Each chapter includes a selection of problems to aid learning and a solutions manual is available on request **Polymer Chemistry** Derek Brian Valentine Parker,1974 An Introduction to Polymer Chemistry D. Margerison,G. C. East,1967

Basics of Polymer Chemistry Muralisrinivasan Natamai Subramanian,2022-09-01 Basics of Polymer Chemistry is of great interest to the chemistry audience The basic properties of polymers including diverse fundamental and applied aspects are presented This book constitutes a basis for understanding polymerization and it presents a comprehensive overview of the scientific research of polymers The chapters presented can be used as a reference for those interested in understanding the sustainable development in polymers Basics of Polymer Chemistry provides a balanced coverage of the key developments in this field and highlights recent and emerging technical achievements The topics covered present a comprehensive overview of the subject area and are therefore of interest to professors and students The recent developments in polymerization using catalysts homo and copolymerization are presented and it contains current efforts in designing new polymer architectures Improved property performance attributes of the polymers by controlling their molecular structural characteristics such as molecular weight distribution comonomer type content distribution and branching level are also discussed Polymerization Reactions Akihiro Abe,Ann-Christine Albertsson,Karel Dusek,Jan Genzer,Shiro Kobayashi,Kwang-Sup Lee,Ludwik Leibler,Timothy E. Polymerization Reactions ,2014-03-12 **Click Polymerization** Anjun Qin,Ben Zhong Tang,2018 Click Polymerization has been edited by world renowned experts and provides an authoritative guide to this reaction type Polymer Synthesis: Theory and Practice Dietrich Braun,Harald Cherdron,Matthias Rehahn,Helmut Ritter,Brigitte Voit,2006-10-14 The first

English edition of this book was published in 1971 with the late Prof Dr Werner Kern as coauthor In 1997 for the preparation of the third edition Prof Dr Helmut Ritter joined the team of authors and in 2001 Prof Dr Brigitte Voit and Prof Dr Matthias Rehahn complemented this team The change in authors has not altered the basic concept of this 4th edition again we were not aimed at compiling a comprehensive collection of recipes In stead we attempted to reach a broader description of the general methods and techniques for the synthesis modification and characterization of macromolecules supplemented by 105 selected and detailed experiments and by sufficient theoretical treatment so that no additional textbook be needed in order to understand the experiments In addition to the preparative aspects we have also tried to give the reader an impression of the relation of chemical structure and morphology of polymers to their properties as well as of areas of their application
