

Alien Periodic Table

Introduction

Imagine that inhabitants of another planet send a message to Earth that contains information about 30 elements. However, the message contains different names and symbols for these elements than those used on Earth. Which elements on the periodic table do these "alien" names represent?

Objective:

To draw conclusions about the Earth names of the alien elements based on atomic number.
To classify elements based on their properties.
To infer the position of the elements on the periodic table.

Materials

- periodic table for reference

Procedure

1. Listed below are data on the chemical and physical properties of the 30 elements. Use the clues to determine which Earth elements correspond to the "alien" ones. Place the elements in their proper position in the blank periodic table (three are given in case of mistakes – **Only the bottom will be graded – make sure it is neat and fully complete!!!**).
 - The noble gases are bombal (Bo), wobble (Wo), jeptum (J), and logon (L). Among these gases, wobble has the greatest atomic mass and bombal the least. Logon is lighter than jeptum.
 - The most reactive group of metals are xtalt (X), byyou (By), chow (Ch), and quackzil (Q). Of these metals, chow has the lowest atomic mass. Quackzil is in the same period as wobble.
 - Apstrom (A), vulcania (V), and kratt (Kt) are nonmetals whose atoms typically gain or share one electron. Vulcania is in the same period as quackzil and wobble.
 - The metalloids are ernst (E), highho (Hi), terriblum (T), and sississ (Ss). Sississ is the metalloid with the greatest atomic mass. Ernst is the metalloid with the lowest atomic mass. Highho and terriblum are in Group 14. Terriblum has more protons than highho. Yazzer (Yz) touches the zigzag line, but it's a metal, not a metalloid.
 - The lightest element of all is called pfsst (Pf). The heaviest element in the group of 30 elements is eldorado (El). The most chemically active nonmetal is apstrom. Kratt reacts with byyou to form table salt.

Chemistry with Inorganic

Qualitative Analysis Therald Moeller,1980 **The Nature of Research** Angela Brew,2002-11-01 Increasingly new academics are entering higher education without conventional research training and without a clear idea of what research actually involves This is particularly true of academics who enter from having spent time in a profession including many in the newer disciplines In addition institutions of higher education which do not have a tradition of research are increasingly competing for research funding The Nature of Research looks at this background and discusses what is wrong with academic research and discusses what is wrong with academic research today what needs to change for it to survive how to allow new kinds of research to flourish directions for future action and how academic research can teach us to live in today's complex and uncertain society The aim of the book then is to provide a stimulus to thinking about the nature and role of research with a view to considering what might be appropriate in the next century Since research is so central to university life looking at research will tell us much about what the university of the future might be like

Meta Andrew Murtagh, Adam Lee, 2017-12-06 Meta chronicles the journey of Andrew Murtagh and Adam Lee in their uncommon exchange turned friendship. Why is there something rather than nothing? Does God exist? What of goodness, free will, and consciousness? What is the ultimate nature of reality and how does that extend into the public square? In this treatise two young corporate professionals aim to change the way the discussion is being had from the vantage points of Christianity and atheism. Is theism or atheism more compelling? If theism, why Christianity? Did Jesus even exist? After theism, atheism, then what? What is the good life? Is morality objective? What does abortion, education, and healthcare look like in the just city? Embarking on a quest for truth on the big questions, their worldviews clash in a philosophical tour de force. In their discord, a blossoming friendship in their agreement vows to change the world.

Classroom Integration of Type II Uses of Technology in Education Cleborne Maddux, 2012-11-12 Develop new strategies for using computers in the classroom. Educators have talked about using information technology to improve teaching since the beginning of the modern computer movement, but true integration remains an elusive goal for most. Classroom Integration of Type II Uses of Technology in Education finds teachers who have managed to take advantage of the sophistication, power, and affordability of today's technology to develop new and better strategies for learning despite the absence of an effective institutional infrastructure. This unique book reviews effective Type II teaching applications and software used at all educational levels, including Lego Logo technologies, idea technologies, graphics software, laptop computers, and handheld computers. Information technology in schools has failed to fulfill its considerable potential because without a widespread instructional support system, computers are generally poorly used and not integrated meaningfully into classroom activities. But some educators have still been able to implement Type II applications of information technology in their educational settings. Classroom Integration of Type II Uses of Technology in Education looks at their innovative methods of using computers to bring about more effective teaching and learning. Classroom Integration of Type II Uses of Technology in Education examines computer activities of grade 1-5 students using Lego Logo technologies, using Kid Pix graphics software for creative activities, the Technology Integration Assessment Instrument (TIAI), gender disparity in computer-oriented problem solving, a three-tiered idea technology classification system, pre-service teacher preparation, assistive technology, definitions, legislation, and implementation issues, lesson plans, and document techniques for laptop computers, an action instructional model for using handheld wireless computers in the classroom. Classroom Integration of Type II Uses of Technology in Education is an invaluable resource for academics working in information technology and education and for K-12 teachers and administrators.
