Michelangelo's Sculpture Leo Steinberg,2018-11-28 Leo Steinberg was one of the most original and daring art historians of the twentieth century known for taking interpretative risks that challenged the profession by overturning reigning orthodoxies In essays and lectures that ranged from old masters to contemporary art he combined scholarly erudition with an eloquent prose that illuminated his subject and a credo that privileged the visual evidence of the image over the literature written about it His works sometimes provocative and controversial remain vital and influential reading

For half a century Steinberg delved into Michelangelo's work revealing the symbolic structures underlying the artist's highly charged idiom. This volume of essays and unpublished lectures explicates many of Michelangelo's most celebrated sculptures applying principles gleaned from long hard looking. Almost everything Steinberg wrote included passages of old-fashioned formal analysis but here put to the service of interpretation. He understood that Michelangelo's rendering of figures as well as their gestures and interrelations conveys an emblematic significance masquerading under the guise of naturalism. Michelangelo pushed Renaissance naturalism into the furthest reaches of metaphor using the language of the body and its actions to express fundamental Christian tenets once expressible only by poets and preachers or as Steinberg put it in Michelangelo's art anatomy becomes theology. Michelangelo's Sculpture is the first in a series of volumes of Steinberg's selected writings and unpublished lectures edited by his longtime associate Sheila Schwartz. The volume also includes a book review debunking psychoanalytic interpretation of the master's work a light-hearted look at Michelangelo and the medical profession and finally the shortest piece Steinberg ever published.

i in the sky Alison Scammell, 2023-04-28. i in the sky is a collection of essays by over 40 experts including leading writers Charles Handy and Don Tapscott giving their personal vision of the future of information. Information here is given its widest meaning and includes such subjects as the Internet, electronic commerce, cybernetics, robotics, artificial intelligence and even computers as fashion accessories. Information as a phenomenon pervades all areas of life and its evolution has consequences for everyone. Many of the papers have central themes such as the future of computer intelligence, library and information services, interactive Internet marketing and networked learning in higher education. One paper links the technology enabling remote and online communication to the deconstruction of the corporation and the rise of flexible working. Professor Kevin Warwick writes about cybernetics and artificial intelligence and describes an experiment involving a surgically implanted computer chip in his arm. Other papers deal with scholarly communication, smart houses and intelligent appliances. Two of the chapters are written as fiction, one by contemporary fantasy writer Lise Leroux who paints a menacing vision of human error in a tale of virtual reality.
