a rapid increase in the application of electrophysiologic measurement techniques in evaluating patients with hearing and
balance disorders Advances in computer technology have generated new and exciting applications in the areas of
electrocochleography electroneuronography electronystagmography and the auditory brainstem response This book
examines these recent developments and explores new areas of the field currently under investigation An important issue in
electrocochleography today is the widened AP SP complex Contributors to this book evaluate its significance in patients with
cerebellopontine angle tumor The many applications of the auditory brainstem response are surveyed as well as the current
status of the mid and long latency evoked responses An overview of the relatively new area of otoacoustic emissions and its
clinical applications is also included Practicing otolaryngologists otolaryngology residents audiologists audiology students
