

Key-In-Ignition Reminder

If the driver's door is opened when the key is in the ignition lock, a signal will sound to remind you to remove the key.

Ignition Switch Lamp

The switch is lighted when the driver's door is opened. The lamp will remain on for approximately 20 seconds after door is closed to facilitate inserting the key.

SECURITY AGAINST THEFT

Over 1 million vehicles were stolen last year!

In many states it is against the law to leave the ignition keys in an unattended vehicle. Your new vehicle is excellent built-in security; but, you must use it!

... LOCK YOUR VEHICLE

... GUARD YOUR KEYS

... PROTECT YOUR INVESTMENT

Don't contribute to the "crime of opportunity" — VEHICLE THEFT.

Theft Prevention Labels

The Federal Motor Vehicle Theft Prevention Standard requires certain major components on your vehicle to be labeled with the vehicle identification number. The purpose of this regulation is to reduce the incidence of vehicle theft and to assist in the recovery of stolen property. These labels should not be altered or removed.

DOOR LOCKS

The doors are locked by pushing in on the forward portion of the rocker lever. If the lever is in the locked position when the door is closed, the door will

lock. Therefore, make sure the keys are not inside the car before closing the door.

ILLUMINATED ENTRY SYSTEM (If so equipped)

When either front door handle is lifted, the interior lights will go on and the exterior door lock cylinders will be illuminated.

The lights will go off after approximately 30 seconds, or when the ignition switch is turned to the ON position.

The acrylic lens, built into the lock cylinder, will retain its appearance and light output if given proper care. A mild soap and water solution is usually all that is required to clean the lens. Oil or grease can be removed with solvents such as kerosene, methanol, dry cleaning naphtha or hexane. These solvents are toxic and flammable and should only be used in a ventilated area away from open flames.

Solvents such as benzene, gasoline, acetone, carbon tetrachloride or denatured alcohol should never be used, as they will soften and deteriorate the lens.

Remote Trunk Lid Release

The trunk lid can be opened from driver's seat with a cable-operated remote release. The control lever is mounted on the outboard side of the seat riser, adjacent to the sill trim, and is identified with a car silhouette.

Trunk Lid Release

As a security measure, a remote release "override" control is built into the trunk lid latching mechanism. Move the lever outward before closing the trunk lid and the remote release will not function. This feature prevents entry into the trunk without a key.
