

Stern Drive Fuel and Electrical Systems

What's important?

- Fuel leakage must be prevented.
- Stray electric sparks must not happen.

What Could Happen?

Gasoline can explode and/or burn easily:

- When boosting, fuel leaking in the engine compartment could be ignited by a damaged or deteriorated electrical part (or loose wire connection) making stray sparks.

How Can Fire and Explosion Be Minimized?

- Read, understand, and follow manufacturers instructions.
- Closely follow the warnings marked with this symbol  . . .
- Do not substitute fuel or electrical parts with other parts which may look the same. These parts are designed and manufactured to meet special US Coast Guard safety regulation requirements to prevent fire and explosion.

If you work on stern drive or inboard engines, you must understand these Coast Guard requirements. If you don't have them, write to:

National Technical Information Service
Springfield, Virginia 22161

... and ask for copies of:

- (1) Electrical System Compliance Guideline (AD/A-049-638)
(2) Fuel System Compliance Guideline (AD/A-047-767)

These are good guidelines - easy to read and understand. They explain what must be done to prevent fire and explosions.
