Principles and Practice of Semantic Web Reasoning Hans J. Ohlbach,Sebastian Schaffert,2004-09-02 The best informal definition of the Semantic Web is maybe found in the May 2001ScientificAmericanarticle TheSemanticWeb Berners Leeetal which says TheSemanticWebisanextensionofthecurrentWebinwhichinformation is given well defined meaning better enabling computers and people to work in cooperation People who work on the Semantic Web quite often base their work on the famous semantic web tower a product of Tim Berners Lee s inspiring drawing on whiteboards The lowest level is the level of character representation Unicode and the identification of resources on the Web URIs The highest level concerns the problem of trusting information on the Web Somewhere in the middle of the tower is the logic level It addresses the problem of representing information on the Web in a way so that inference rules can derive implicit information from explicitly stated information The workshop Principles and Practices of Semantic Web Reasoning PPSWR 2004 addressed problems on this level It took place in September 2004 as a satellite event of the 20th International Conference on Logic Programming ICLP in St Malo France After PPSWR 2003 in Mumbai India it was the second workshop in this series This book contains the articles presented at the workshop

Social Networks and the Semantic Web Peter Mika,2007-10-23 Science is like a tree contrary to popular belief both trees and science grow at their edges not at their core For science this means that most of the fruitful and exciting developments are not happening at the core of established elds but are instead happening at the boundaries between such elds This has been particularly true for Computer Science The most interesting database developments don t happen inside the Database community but rather where databases hit Biology Similarly the most interesting developments in Ar cial Intelligence in recent years have happened where AI met the Web Theyoung eldofSemanticWebresearchhasbeenoneoftheresultsofanumber of different sub elds of Computer Science being exposed to the challenges of the Web databases computational linguistics knowledge representation knowled based systems and service oriented computing are just some of the sub elds that are all making contributions to the Semantic Web vision namely a Web that consists not only of linksbetween web pagesfull of picturesand text but of a Semantic Web that consists of links between computer interpretable data Such a Semantic Web would make it possible to query and reason over integrated data sets consisting of separate pieces of information that were never intended to be linked together but that can nevertheless be fruitfully combined and integrated sometimes even by a third party who neither wrote nor ownsany of the original piecesof data just as is possible with web pages on the current Web
