Haswell,2025-10-10 This book is focused on how research related to a successful podcast around life in academia Lost in Citations has developed and explores the activity of podcasting as a method of data collection and analysis Though the podcast has become established as a legitimate and popular form of entertainment and information it is little understood as a genuine scholarly research tool Long form discussions recorded as live interviews are a form of grounded approach to collecting data An interview of this kind cannot set out with a complete set of questions Questions that yield interesting paths of investigation generally only happen emergently in the moment If one only wanted to know the stated thesis of the paper one could merely re read it The author explores a profound and novel way to understand the subject the writer and the contents of the work This book is a companion to the author s previous work Podcasting Giving a Voice to the Words Ethics Press 2025 The key audience is scholars interested in alternative methods of data collection in a time of near unlimited data without adequate scaffolding Young researchers may listen to podcasts for entertainment but may not think of them as sources of valuable academic information This book is intended to help readers understand methods that could help them bring information to the attention of others quickly yet accurately in a time of potential information overload **Short Circuiting Policy** Leah Cardamore Stokes,2020 In 1999 Texas passed a landmark clean energy law beginning a groundswell of new policies that promised to make the US a world leader in renewable energy As Leah Stokes shows in Short Circuiting Policy however that policy did not lead to momentum in Texas which failed to implement its solar laws or clean up its electricity system Examining clean energy laws in Texas Kansas Arizona and Ohio over a thirty year time frame Stokes argues that organized combat between advocate and opponent interest groups is central to explaining why states are not on track to address the climate crisis She tells the political history of our energy institutions explaining how fossil fuel companies and electric utilities have promoted climate denial and delay Stokes further explains the limits of policy feedback theory showing the ways that interest groups drive retrenchment through lobbying public opinion political parties and the courts More than a history of renewable energy policy in modern America Short Circuiting Policy offers a bold new argument

about how the policy process works and why seeming victories can turn into losses when the opposition has enough resources to roll back laws
