CONTROL SYSTEMS, ROBOTICS AND AUTOMATION - Volume XX Heinz D. Unbehauen,2009-10-11 This Encyclopedia of Control Systems Robotics and Automation is a component of the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This 22 volume set contains 240 chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It is the only publication of its kind carrying state of the art knowledge in the fields of Control Systems Robotics and Automation and is aimed by virtue of the several applications at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs Fatal Abstraction Darryl Campbell,2025-04-08 A tech insider explains how capitalism and software development make for such a dangerous mix Software was supposed to radically improve society Outdated mechanical systems would be easily replaced programs like PowerPoint would make information flow more freely social media platforms like Facebook would bring people together and generative AI would solve the world s greatest ills Yet in practice few of the systems we looked to with such high hopes have lived up to their fundamental mandate In fact in too many cases they ve made things worse exposing us to immense risk at the societal and the individual levels How did we get to this point In Fatal Abstraction Darryl Campbell shows that the problem is managerial software programs created and overseen not by engineers but by professional managers with only the most superficial knowledge of technology itself The managerial ethos dominates the modern tech industry from its globe spanning giants all the way down to its trendy startups It demands that corporate leaders should be specialists in business rather than experts in their company s field that they manage their companies exclusively through the abstractions of finance and that profit margins must take priority over developing a quality product that is safe for the consumer and beneficial for society These corporations rush the development process and package cheap unproven potentially dangerous software inside sleek and shiny new devices As Campbell demonstrates the problem with software is distinct from that of other consumer products because of how quickly it can scale to the dimensions of the world itself and because its inner workings resist the

efforts of many professional managers to understand it with their limited technical background A former tech worker himself Campbell shows how managerial software fails and when it does what sorts of disastrous consequences ensue from the Boeing 737 MAX crashes to a deadly self driving car to PowerPoint propaganda and beyond Yet just because the tech industry is currently breaking its core promise does not mean the industry cannot change or that the risks posed by managerial software should necessarily persist into the future Campbell argues that the solution is tech workers with actual expertise establishing industry wide principles of ethics and safety that corporations would be forced to follow Fatal Abstraction is a stirring rebuke of the tech industry s current managerial excesses and also a hopeful glimpse of what a world shaped by good software can offer

In the Event of a Water Landing Michael G. Walling, 2010 In the Event of a Water Landing At 8 15 A M on October 14 1947 Chuck Martin the 26 year old pilot of the Boeing 314 flying boat named Bermuda Sky Queen attempted to do what had never been done before land an 88 000 pound aircraft in thirty five foot high seas The lives of sixty eight passengers and crew on board depended on his ability A mile away was the 327 foot US Coast Guard Cutter George M Bibb The cutter s crew watched as the plane descended If Sky Queen survived the landing getting the passengers to safety would be their job Nine years later and half a world away Captain Richard Ogg flying the Pan American Airways Stratocruiser Sovereign of the Skies was forced ditch the aircraft along with its forty three passengers and crew The Coast Guard was nearby Manning Ocean Station November was the US Coast Guard Cutter Pontchartrain Once more rescuing the survivors would be in their hands In the Event of a Water Landing tells for the first time the full stories of the Bermuda Sky Queen and Sovereign of the Skies rescues the only two completely successful open ocean ditchings in Commercial Aviation history These two stories encompass many facets of ditchings bad weather engine failure horrific sea conditions and indomitable courage in the face of death Between these two are tales of other ditchings as well as the journey we humans have undertaken from the beginning of transoceanic flight to today Using the voices of passengers flight crew and those who rescued them an amazing tale unfolds Their vivid memories interspersed with contemporary news reports serve to flesh out the unemotional entries from official investigations These ditchings and rescues embody the hopes fears and courage of people facing death hundreds of miles from land and the audacity of the men who risked their own lives to save them

The True Story of the "Miracle on the Hudson" National Transportation Safety Board, 2022-11-13 In The True Story of the Miracle on the Hudson the National Transportation Safety Board meticulously documents the flight of US Airways Flight 1549 which famously executed an emergency landing in the Hudson River on January 15 2009 Blending detailed technical analysis with gripping narrative the book explores the events leading up to the incident the critical decision making processes of the flight crew and the subsequent rescue efforts Its literary style balances a formal investigation tone with accessible storytelling making it an essential study within the context of aviation safety literature and emergency response protocols The National Transportation Safety Board NTSB an independent U S government agency

dedicated to civil transportation accident investigation has been at the forefront of aviation safety enhancement since its inception in 1967 By compiling firsthand accounts investigative findings and technical data the NTSB aims to uncover systemic issues cultivating a deeper understanding of both human and mechanical factors that contribute to aviation accidents This publication reflects the NTSB s commitment to preventing future tragedies through education and transparency This book is highly recommended for aviation enthusiasts safety professionals and general readers alike By illustrating the intricate interplay of human skill technology and fleet safety procedures the NTSB not only honors the heroism displayed during the crisis but also emphasizes the importance of learning from such events to enhance future safety protocols

Aircraft Accident Report , **A New Approach for Disruption Management in Airline Operations Control** António J. M. Castro,Ana Paula Rocha,Eugénio Oliveira,2014-06-19 Most of the research efforts dealing with airline scheduling have been done on off line plan optimization However nowadays with the increasingly complex and huge traffic at airports the real challenge is how to react to unexpected events that may cause plan disruptions leading to flight delays Moreover these disruptive events usually affect at least three different dimensions of the situation the aircraft assigned to the flight the crew assignment and often forgotten the passengers journey and satisfaction This book includes answers to this challenge and proposes the use of the Multi agent System paradigm to rapidly compose a multi faceted solution to the disruptive event taking into consideration possible preferences of those three key aspects of the problem Negotiation protocols taking place between agents that are experts in solving the different problem dimensions combination of different utility functions and not less important the inclusion of the human in the automatic decision making loop make MASDIMA the system described in this book well suited for real life plan disruption management applications
