Freedom and Other Keys to Creativity Joaquim Franch, 2022-06-13 There is a lot of buzz on

creativity and there are many ways to look at it but in this book you will not find a methodology for unlocking your inner creative soul Instead you will be immersed in a thought provoking dive into neuroscience philosophy psychology and a variety of references from arts and sciences Creativity takes courage and it also takes time one must take the existential approach of becoming a meaningful engagement with life Enjoy creativity as a process not as a tool to conquer a goal Most people read one or two books on creativity in a lifetime Joaquim Franch has probably read them all In this book he has broken them down sorted out the common denominators and put them in order to produce a book that is both thought proving and practical An essential read for anyone interested in creativity Ian Gibbs with a degree in astrophysics and a postgrad in education is an entrepreneur working as a learning strategies specialist Author of The Sorites Principle and the 2022 TEDx Talk The Secret Key to Learning Hidden in Plain Sight I consider it of great value that the author has made use of creative parameters to address its nature The result is a useful and original book that undoubtedly helps to take a step further in understanding creativity Matilde Obradors Professor in the Department of Communication at the Pompeu Fabra University Barcelona Author of Creatividad y generaci n de ideas My friend Joaquim is a true generalist and a systems thinker and not surprisingly with this work he has achieved a balanced vision of a widely studied subject in the Anglo American world It s an honest intellectual analysis of diverse sources Pere Mar s former Professor in the Automatic Control Department at the Polytechnic University of Catalonia Barcelona

Against Austerity Richard Seymour, 2014-03-19 Five years into capitalism s deepest crisis which has led to cuts and economic pain across the world Against Austerity addresses a puzzling aspect of the current conjuncture why are the rich still getting away with it Why is protest so ephemeral Why does the left appear to be marginal to political life In an analysis which challenges our understanding of capitalism class and ideology Richard Seymour shows how austerity is just one part of a wider elite plan to radically re engineer society and everyday life in the interests of profit consumerism and speculative finance But Against Austerity is not a gospel of despair Seymour argues that once we turn to face the headwinds of this new reality dispensing with reassuring dogmas we can forge new collective resistance and alternatives to the current system Following Brecht

Against Austerity argues that the good old things are over it s time to confront the bad new ones **Media Capitalism**

Thomas Klikauer,2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media s ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book s historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society Between Scientists & Citizens Jean Goodwin,2012 This volume brings together selected papers from an interdisciplinary conference focused on effective and appropriate communication of science in the often heated controversies characteristic of contemporary democracies The forty essays represent cutting edge work from rhetorical and communication theorists studying the practices and norms of public discourse and science communication philosophers interested in the informal logic of everyday reasoning and in the theory of deliberative democracy and science studies scholars examining the intersections between the social worlds of scientists and citizens Topics include the theory and practice of public participation exercises involving experts and lay publics communication techniques for conveying uncertainty complexity and scale pseudocontroversy and manufactured doubt about science and the maintenance of trust between scientists and citizens
